

2010 COMMODITY STORAGE AREA QUALIFICATION FORM

As Required by Part 169, Scrap Tires, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, Section 16903(5)

INSTRUCTIONS: This form is to be used to describe the commodity storage area that may qualify for exemption from bonding under Part 169, Section 16903(5), and must be submitted to: Scrap Tire Regulatory Program, Waste and Hazardous Materials Division, Michigan Department of Environmental Quality, P.O. Box 30241, Lansing, MI 48909-7741. The total acreage of the commodity storage area may only be one (1) acre or less; additional commodity storage areas must be bonded in accordance with Section 16903(4). Section 16903(5)(c) states that the storage areas must be surveyed by a **registered professional engineer**. See page 3 for definition and requirements for exemptions. Please print in ink.

DEFINITIONS AND EXEMPTIONS

Definitions

Section 16901(e) "Commodity" means crumb rubber, tire chips, a ring or slab cut from a tire for use as a weight, or a product die-cut or punched from a tire, or any other product that, as determined by the department based on the product's production cost and value, is not likely to result in an accumulation, at the site of production or use, that poses a threat to public health or the environment. A product is not a commodity unless it meets published national standards or specifications that the department determines are relevant to accomplishing the purposes of this part.

Section 16901(y) "Tire Chip" means a portion of a tire that is any of the following:

- (i) Not more than 2 inches by 2 inches in size and meets requirements for size, metal content, and cleanliness as specified in an executed contract for delivery of the material by the scrap tire processor.
- (ii) Not more than 3/8 inch by 3/8 inch in size and sufficiently free from steel to be used in the construction and modification of sports surfaces such as golf course turf, athletic field turf, athletic tracks, hiking surfaces, livestock show arena surfaces, and playgrounds.
- (iii) To be used in a drain field approved under a district or county sanitary code.
- (iv) To be used as ground cover or mulch, if, in aggregate, 95% of the material is equal to or less than 3/4 inch in size in any dimension and the material contains less than 1% by weight or volume of steel and fiber.
- (v) Approved by the department for use at a landfill as daily cover or a leachate collection system protective layer or for access road construction within a lined cell.

Commodity Storage Area Exemption

Section 19503(5) a bond is not required for a commodity storage area that meets all of the following requirements:

- (a) The commodity is stored in accordance with the storage requirements of Section 16903(1).
- (b) Not less than 75% of the commodity, by weight or volume, that is stored at the collection site each calendar year is removed from the collection site to a market during that year, and the collection site owner or operator certifies compliance with this subparagraph on a form approved by the department.
- (c) The areas of the scrap tire collection site that are used for storage of the commodity are not larger than a total of 1 acre and those areas are indicated on a survey by a registered professional engineer submitted to the department as part of the collection site registration.
