Market Spotlight: Costa Rica

Costa Rica’s lead trading partner is the United States; U.S. exports to Costa Rica account for over 47% of their import needs. Major exports include bulk commodities such as corn, soybeans and wheat. Other exports that are in demand by Costa Rica include snack foods, non-domestic fruits, and meat.

The Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR) brings advantages to U.S. exporters. CAFTA-DR allows half of all agricultural products to be duty free. It also eliminates Costa Rica’s dealer protection regimes, allows nondiscriminatory treatment for U.S. firms in government procurement bids, and provides stronger protection for investors.

Companies interested in exploring to Costa Rica should consider traveling on the Focused Trade Mission to Costa Rica through Food Export Association of the Midwest. The trip is scheduled for May 14 – 16, 2012.

Attendees meet one-on-one with buyers and learn more about this emerging market. For more information CLICK HERE or contact Jamie Zmitko-Somers at zmitkoj@michigan.gov.
