

MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES

NOTICE OF PROPOSED POLICY

Public Act 280 of 1939, as amended, and consultation guidelines for Medicaid policy provide an opportunity to review proposed changes in Medicaid policies and procedures.

Please review the policy summary and the attached materials that describe the specific changes being proposed. Let us know why you support the change or oppose the change.

Submit your comments to the analyst by the due date specified. Your comments must be received by the due date to be considered for the final policy bulletin.

Thank you for participating in the consultation process.

Director, Program Policy Division
Bureau of Medicaid Policy and Health System Innovation

Project Number: 1540-Pharmacy	Comments Due: September 8, 2015	Proposed Effective Date: January 1, 2016

Policy Subject: Medicaid Health Plan Common Formulary

Affected Programs: Medicaid, Healthy Michigan Plan, Children's Special Health Care Services (CSHCS)

Distribution: All Providers

Policy Summary: For the next Comprehensive Health Plan Contract, the Michigan Department of Health and Human Services (MDHHS) is requiring health plans to follow a common drug formulary that establishes minimum drug coverage requirements. The current version of the common formulary is a draft. The final version of the common formulary will be posted by January 1, 2016. Health plans will integrate the common formulary in their claims system and will begin transitioning members' drug therapies to the common formulary starting April 1, 2016. It is expected that all members' drug therapies will be transitioned to the common formulary by September 30, 2016.

Purpose: To streamline drug coverage policies and reduce administrative burden for providers, and to reduce interruptions in a beneficiary's drug therapy due to a change in health plan.

Proposed Policy Draft

Michigan Department of Health and Human Services
Medical Services Administration

Distribution: All Providers

Issued: December 1, 2015 (Proposed)

Subject: Medicaid Health Plan Common Formulary

Effective: January 1, 2016 (Proposed)

Programs Affected: Medicaid, Healthy Michigan Plan, Children's Special Health Care Services (CSHCS)

In order to streamline drug coverage policies for Medicaid and Healthy Michigan Plan members and providers, the Michigan Department of Health and Human Services (MDHHS) will pursue a formulary that is common across all contracted Medicaid Health Plans (MHPs) for the next Comprehensive Health Plan Contract. A common formulary will better align coverage across health plans. The intent is to reduce interruptions in a member's drug therapy due to a change in health plan. The development of the common formulary is required under Section 1806 of Public Act 84 of 2015.

The final version of the common formulary will include certain drug utilization management tools, such as quantity limits, age and gender edits, prior authorization criteria and step therapies. MHPs may be less restrictive, but not more restrictive, than the coverage parameters of the common formulary. The list of drugs that are currently covered under the Fee-for-Service benefit will remain unchanged. The current version of the common formulary has been included with this bulletin.

To promote safe medication transitions and minimize the burden on prescribers and patients, all contracted MHPs will be required to follow one set of policies and procedures on transition of care and grandfathering of drug therapy.

The final version of the common formulary will be posted by January 1, 2016. MHPs will integrate the Common Formulary in their claims system and will begin transitioning members' drug therapies to the common formulary starting April 1, 2016. With the exception of drug therapies that have been grandfathered, it is expected that all members' drug therapies will be transitioned to the common formulary by September 30, 2016.

Once the common formulary is finalized it will be reviewed on a quarterly basis. During these reviews new medications that are Food and Drug Administration (FDA)-approved will be evaluated after they have been available in the marketplace for at least six months.

The Department's Preferred Drug List Supplemental rebates will continue to apply to the Fee-for-Service program and will not be part of this project. Available Federal Medicaid rebates will continue to be invoiced for both the Fee-for-Service and MHP lines of business.
