Appendix D: 2007-08 PSA Update	
Appendix E: One-Page Profiles of Michigan PSAs	

Statutory Basis

This report is submitted to the Michigan Legislature in fulfillment of the State Board of Education's responsibilities pursuant to sections 501a and 1311c of 1976 PA 451 (MCL 380.501a and MCL 380.1311c), which state:

380.501a Public school academy; report to legislative committees on education.

Sec. 501a.

Not later than 1 year after the effective date of this section, and at least annually thereafter, the state board shall submit a comprehensive report, with findings and recommendations, to the house and senate committees on education. The report shall evaluate public school academies generally, including, but not limited to, an evaluation of whether public school academies are fulfilling the purposes specified in section 511(1). The report also shall contain, for each public school academy, a copy of the academy's mission statement, attendance statistics and dropout rate, aggregate assessment test scores, projections of financial stability, and number of and comments on supervisory visits by the authorizing body.

380.1311c Strict discipline academy; report; evaluation; contents.

Sec. 1311c.

Not later than 1 year after the effective date of this section, and at least annually thereafter, the state board shall submit a comprehensive report, with findings and recommendations, to the house and senate committees on education. The report shall evaluate strict discipline academies generally, including, but not limited to, an evaluation of whether strict discipline academies are fulfilling the purposes specified in former section 511(1). The report also shall contain, for each strict discipline academy, a copy of the academy's mission statement, attendance statistics and dropout rate, aggregate assessment test scores, projections of financial stability, and number of and comments on supervisory visits by the authorizing body.

The purposes specified in section 511(1) are as follows:

- (a) To improve pupil achievement for all pupils, including, but not limited to, educationally disadvantaged pupils, by improving the learning environment.
- (b) To stimulate innovative teaching methods.
- (c) To create new professional opportunities for teachers in a new type of public school in which the school structure and educational program can be innovatively designed and managed by teachers at the school site level.
- (d) To achieve school accountability for pupil educational performance by placing full responsibility for performance at the school site level.
- (e) To provide parents and pupils with greater choices among public schools, both within and outside their existing school districts.
- (f) To determine whether state educational funds can be more effectively, efficiently, and equitably utilized by allocating funds on a per pupil basis directly to the school rather than through school district administration.

Introduction

The continuing evolution of Michigan's charter public school sector has generated new opportunities for leadership and change. Once regarded as a policy experiment, public school academies (PSAs) continue to earn greater legitimacy in Michigan's K-12 educational marketplace.

This legitimacy has come about as a result of some interesting trends. For example, a number of families and community leaders, particularly those in urban areas, have come to view PSAs as an instrument of social justice. They contend the ability to choose a school for one's child should not be a privilege that belongs only to those families who can afford to pay tuition or move to a preferred location, but to everyone.

In addition, authorizers' willingness to close schools that do not meet the terms of their performance contracts has bolstered the legitimacy of PSAs. These closures – a total of 38 to date – are evidence that authorizers are holding PSAs accountable, and also are instructive for leaders seeking to address performance issues in traditional K-12 schools.

The blending of these two policy ideals – social justice and accountability – brings about an interesting dynamic for Michigan PSAs. They serve a higher percentage of low-income children than their traditional K-12 counterparts, and they simultaneously face serious consequences for low student achievement. PSAs are uniquely positioned to help Michigan reduce the achievement gap between affluent children and children in poverty. An appendix to this report explores the work of 52 individual PSAs across Michigan that are “beating the odds” and achieving favorable academic results with economically disadvantaged student populations. A complementary study focusing on the traditional schools that fall into this category is underway and will be issued later in 2009.

This is not to say that PSAs are without their challenges; growing pains remain and continued attention is needed to ensure academic and operational success. In general, academic performance in charters is below statewide traditional public school averages; if PSAs are truly to be an effective lever for change across the state and not just in specific communities, their overall rate of student achievement must make greater gains. In particular, high school performance requires targeted, intensive focus and improvement. Michigan PSAs have experienced challenges with student performance in grades 9-12; additional work is needed to bring up achievement in these grades.

Ongoing financial pressures can also result in inadequate PSA budgeting and decision-making at the board level. The development of PSA board leaders is critical to addressing these issues and to the establishment and operation of successful schools. High quality training and leadership development opportunities are needed to prepare the boards for the responsibilities of adopting a quality educational program and delivering positive student results, hiring staff or contracting with a service provider (also known as a management company), entering into lease/purchase agreements, and complying with all applicable aspects of state and federal law. To date, authorizers provide this support once a board member has been screened and appointed, but additional training and outreach may be of benefit. The Michigan Department of Education (MDE) is helping to foster the development of strong, autonomous boards by using a portion of its Federal Charter Schools Program grant funding to help independent grassroots and local community developers understand the importance of the board role before they make important decisions and recommendations.

Leadership development at the school staff level is also important. PSA teachers often assume greater leadership responsibilities and have greater influence on school management and decision-making than their traditional district counterparts. Small staff sizes result in a broader distribution of administrative tasks, helping PSA teachers grow as school leaders. In some cases, PSAs have begun recognizing leadership potential more quickly and promoting staff from within, raising some intriguing ideas about how PSAs may create smoother paths for teachers to advance professionally.

Service provider (management company) leadership also needs to be explored in greater depth. A majority of the public charter schools in the state use service providers (management companies) to provide some level of staffing and support. Despite this volume, little is known about how service providers (management companies) accomplish their deliverables on a budget that is, on average, \$1,778 per pupil lower than the cluster district average and still manage to retain enough of a profit to maintain their involvement. Ample opportunities for review of various service provider (management company) models and their relative effectiveness exist and should be fully explored.

The opportunities and issues described in this report point to a PSA sector that is becoming more mature and more fully integrated into Michigan's educational landscape. Strategies and expectations for PSAs that are just as high as they are for their traditional K-12 counterparts, while capitalizing fully on the strengths and unique characteristics of PSAs, are bearing fruit.

Note: A Word About "Cluster Districts"

Michigan's public school academies continue to be generally clustered in the state's urban areas. Twenty school districts have three or more PSAs within their boundaries. For purposes of this report, these districts are referred to as "**cluster districts**." This year's cluster districts include: Ann Arbor, Benton Harbor, Dearborn, Detroit, Flint, Grand Rapids, Hamtramck, Highland Park, Holland, Inkster, Jackson, Lansing, Midland, Muskegon, Pontiac, Port Huron, Saginaw, Southfield, Taylor, and Wayne-Westland.

Whenever possible, charts in this report include data for the cluster districts as well as PSA and traditional public school statewide aggregates or averages. The cluster districts comprise a subset of "all traditional public schools" reflecting areas where PSAs are in relatively high demand and it is useful to separate out their data for baseline comparisons.

This type of comparison has been used in MDE's annual PSA report to the Legislature since 2005. It offers an additional point of reference for understanding the performance of charter schools, since the student population in cluster districts approximates that of charter schools more closely than does the statewide average.

Neither a pure statewide average nor the cluster district average, however, offers an ideal statistical measure to use in assessing the overall achievement of charter schools in Michigan. During the coming year, MDE will work with stakeholders to review various ways of analyzing and comparing charter school data in preparation for the issuance of the 2008-09 PSA Report to the Legislature. This year's report, however, retains the analytical framework that has been in place since 2005.

Public School Academy Fundamentals

Authorizers may establish charter public schools under any of three sections of Michigan law:

1. Part 6A of the Revised School Code (MCLA 380.501 – 508) permits 150 state public university-authorized general PSAs and an unlimited number of PSAs authorized within their geographical boundaries by community colleges, intermediate school districts, or local school districts.
2. Part 6C of the Revised School Code (MCLA 380.521 – 529) permits 15 Urban High School Academies to be authorized within the City of Detroit by state public universities.
3. Public Act 23 of 1999 (MCLA 380.1311b – 1311e) permits an unlimited number of Strict Discipline Academies organized to serve suspended or expelled students, or those placed by a court or juvenile agency.

Demographics

Growth in the number of public school academies in Michigan has slowed, but continues despite the cap on the number of public university-authorized Part 6A charter schools. During 2008, the first Urban High Schools authorized under Part 6C of the Revised School Code opened in Detroit. This continued growth, combined with ongoing improvement in academic performance, indicates growing stability in a system that is now thirteen years old and that serves nearly 6% of Michigan schoolchildren.

Five closures and seven new PSAs (a detailed list is included in Appendix D) netted an increase of two PSAs for the 2008-09 school year, bringing the total to 232. This small increase reflects a leveling-off of growth since the 2005-06 school year, as **Figure 1** shows.

Figure 2 (on the following page) shows that the number of students served has continued to grow more steeply than the number of academies. For the 2007-08 school year, the number of students increased by 2,000 pupils.

Geographically, Michigan's public school academies continue to be generally clustered in the state's urban areas. Twenty school districts have three or more PSAs within their boundaries. For purposes of this report, these districts are referred to as **"cluster districts."** This year's cluster districts include: Ann Arbor, Benton Harbor, Dearborn, Detroit, Flint, Grand Rapids, Hamtramck, Highland Park, Holland, Inkster, Jackson, Lansing, Midland, Muskegon, Pontiac, Port Huron, Saginaw, Southfield, Taylor, and Wayne-Westland.

Whenever possible, charts in this report include data for the cluster districts as well as PSA and traditional public school statewide aggregates or averages. The cluster districts comprise a subset of "all traditional public schools" reflecting areas where PSAs are in relatively high demand and it is useful to separate out their data for baseline comparisons.

PSAs continue to serve proportionately more students in grades K-5 than either cluster districts or all traditional public schools. Nearly 60% of PSA students are in these grades, as opposed to 44.4% for cluster districts, and 43% for all traditional public schools. Statewide, 43.9% of students are in this grade range (see **Figures 3 and 4**).

The proportion of middle school and high school students is essentially unchanged this year, although fourteen schools expanded in 2008 by adding a grade in the 6-12 range. Another five schools will be eliminating service in the upper grades.

No schools added elementary grades in fall 2008, but five added pre-K services, while two discontinued pre-K programs.

Figure 5 shows the ethnic make-up of PSAs, cluster districts, and all traditional public schools. The ethnic mix of PSAs tends to closely mirror that of the 20 urban cluster districts where 75% of PSAs are located. African-American students make up more than half the population in PSAs and cluster districts. Caucasian students represent 34% of PSA students and 30% of cluster district pupils. Both cluster districts and the PSAs within them have a significantly lower proportion of Caucasian students than traditional public schools, where Caucasian students are 73% of the population; African-American students make up only 18% of the traditional public school student population.

Participation in free and reduced-price lunch programs is a good proxy for economic status. **Figures 6-8** show that 57.4% of PSA students participate in these programs, which is lower than the 63.2% in cluster districts but higher than the 36.2% in traditional public schools statewide.

Figure 6: PSA Average Free/Reduced Lunch Eligibility

Figure 7: Cluster Districts Average Free/Reduced Lunch Eligibility

Figure 8: All Traditional Public Schools Average Free/Reduced Lunch Eligibility

Figure 9 shows the wide variation in free and reduced-price lunch eligibility in all schools. PSAs and traditional public schools both include schools with participation as low as under 10% and as high as over 90%. Because

statewide averages can hide this variation, scatter-plot displays are used in the following academic section of the report. This allows PSAs to be compared to other schools serving similar populations and differentiated from schools serving different populations.

As of December 2007, PSAs continue to serve a lower percentage of special education students than schools in their cluster districts, as **Figure 10** shows.

Figure 11 (on the following page) divides PSAs, ranked by special education percentage, into ten equal groups. Each group's overall percentage is displayed to illustrate the wide range within PSAs.

Figure 11: December 2007 Range of PSA Special Education Percentages

Figures 12-14 show the proportions of students with different disability types for PSAs, cluster districts, and all traditional public schools. Here, there are no striking differences between the different school populations.

Figure 12: December 2007 Percent of PSA Students by Type of Disability

Figure 13: December 2007 Percent of Cluster District Students by Type of Disability

Figure 14: December 2007 Percent of All Traditional Public School Students by Type of Disability

Figure 15 shows that PSAs are serving a higher percentage of students through alternative education programs, particularly at the high school level. There are a number of PSA programs that have been developed as “second-chance” institutions for students that are at risk, including several Strict Discipline Academies.

PSA Teachers

Nearly 99 percent of teachers in Michigan PSAs meet the definition of “highly qualified” under the Elementary and Secondary Education Act (ESEA), as shown in **Figure 16**. This total is a full percentage point higher than in traditional public schools, but lower than in cluster districts.

Authorizers

Universities and community colleges continue to be the primary authorizers of PSAs. Of the possible 150 provided by statute, 148 PSAs have been authorized by eight universities; 39 by three community colleges; 30 PSAs by 12 Intermediate School Districts (ISDs); and 13 by four local school districts. **Figure 17** shows the 2007-08 distribution of PSAs by individual authorizer.

PSA authorizers are responsible for all of the following activities under Michigan law:

- Reviewing applications and awarding charters to qualified applicants;
- Establishing the method of selection and appointment for board members;
- Issuing charter contracts that include clear expectations for performance;
- Acting as a fiscal agent for state school aid funds;
- Gathering and evaluating data related to school compliance and performance; and
- Taking action based on a school's performance relative to the expectations set forth in the charter contract.

In addition to these responsibilities, many Michigan authorizers have developed additional oversight and support functions. Through the Michigan Council of Charter School Authorizers, they have also adopted a common set of oversight and accountability standards, available at www.mccsa.us.

In 2005, MDE began developing a pilot "Assurances and Verification" program to examine authorizer practices in Michigan. On a voluntary basis, authorizers provide assurances that they have processes and systems in place to ensure 18 important requirements for the PSAs they charter. During a subsequent verification visit, MDE staff examine the authorizer's files and records for a sample of PSAs to ensure that the systems are implemented as described.

During the past three years, Assurances and Verification visits have been conducted for 15 Michigan authorizers. MDE's findings show authorizers are active in their compliance monitoring efforts and that they have, in many instances, developed a broad menu of tools and resources for supporting the academic and financial performance of the PSAs they oversee.

Service Providers (Management Companies)

Michigan law permits PSA boards to contract with service providers (also known as management companies) for various school staffing and support functions, which may include facility management, personnel management, payroll and accounting, curriculum development, and professional development services for staff and teachers. The majority of Michigan PSAs have contracted with one of 53 service providers (management companies) to provide educational services. **Figure 18** shows the number of students served by PSAs using each service provider (management company).

Each PSA/service provider (management company) agreement is unique. Some PSA boards contract for only one or two services, such as human resources or accounting, whereas others choose to contract for all day-to-day staff functions. The variation in service provider (management company) arrangements is broad and difficult to quantify. Some service providers (management companies) work with only one PSA, while others contract with multiple PSAs in Michigan and across the country. Some service providers (management companies) act in only a limited capacity, while others offer complete “turn-key” operations. This widely varied approach to PSA contracting has allowed for the creation of a diverse service provider (management company) marketplace in Michigan.

Service providers (management companies) are accountable to the non-profit PSA boards that hire them. The boards are responsible for setting policy, directing operational and academic performance, and ensuring fiscal stability. Regardless of the type or level of support for which it is contracted, each service provider (management company) operates at the direction of the PSA board.

PSA Boards

PSA board members are public officials that have sworn a constitutional oath of office in Michigan. Each board member undergoes a selection and appointment process established by the PSA's authorizer before being named by the authorizer's governing board.

Some concerns have been raised about whether or not service providers (management companies) in Michigan are able to name their own governing boards and thus exercise some undue level of influence or control over these boards once a school is established. While Michigan law permits the developer of a new PSA to name the members of an initial governing board, it is up to the authorizer to ensure that those board members are qualified, independent voices on behalf of the PSAs they serve.

To ensure procedural consistency across Michigan's authorizing community, the Michigan Council of Charter School Authorizers has adopted standards for this selection and appointment process. At minimum, these standards presume written application for board appointment, a criminal records check, and a personal interview. The standards also delve into potential conflict of interest issues and recommend the use of a disclosure form to be completed by PSA board members on an annual basis. These procedures are designed to ensure board member quality and autonomy and prevent inappropriate PSA board member/service provider (management company) relationships.

The Michigan Department of Education

In addition to monitoring authorizing practices through its pilot "Assurances and Verification" program, MDE provides direct review of PSA compliance and practice. As part of its general leadership and supervision of all public schools in Michigan, the Department reviews schools' compliance with statutory and reporting requirements. MDE also offers the same support to PSAs that traditional districts receive under the federal No Child Left Behind law.

During 2007-08, MDE staff conducted nearly 200 visits to PSAs in Michigan. These visits were conducted by staff working to provide technical support, monitoring and assistance in a variety of areas. In addition, the Department has fielded hundreds of phone calls from PSA staff, parents and community members. MDE staff members will continue to provide support to and monitoring of PSAs in the same manner they work with all other public schools in Michigan.

Academic Achievement in PSAs

Most charter and traditional public schools evaluate academic performance in a variety of ways. For many PSAs, authorizers aggregate academic data within their oversight systems and use this research to inform their accountability decisions. In addition to the Michigan Educational Assessment Program (MEAP) and Michigan Merit Examination (MME), several authorizers also require the use of specific standardized assessments (such as Gates-MacGinitie, Iowa Basic, or Scantron Performance Series), which are used to monitor educational progress and in some cases measure annual growth. These assessments are typically funded through the authorizer's oversight fee and allow comparative analysis within an authorizer's portfolio.

For this report, the fundamental measures used to analyze academic performance are the MEAP and MME, since they are the measures for which data are available for all PSAs and all traditional public schools in the state. The remaining data analyzed in this report combine MEAP's academic data with other factors to derive: Adequate Yearly Progress (AYP), No Child Left Behind (NCLB) phases of school improvement status, Education YES! School Report Card grades, and attendance and graduation rates. These measures are discussed as individual components within the analysis of academic performance.

In each case, the most recent available data are reported. The results used for this report are from fall 2007 elementary and middle school test administration dates and spring 2008 high school testing dates.

Test Performance

The MEAP test is an annual assessment of student achievement based on the Grade Level Content Expectations (GLCEs) as developed and approved by the State Board of Education (SBE) for English Language Arts (ELA) and Mathematics in grades 3-8. These SBE-approved expectations were developed with participation from Michigan educators, parents, community members, university professors, and other experts within each content area and grade level.

The MME consists of three parts:

- The American College Testing (ACT) college entrance examination
- WorkKeys job skills assessments in reading and mathematics
- Michigan assessments in mathematics, science, social studies, and persuasive writing

Students expected to graduate in 2010 took the MME in March 2008. The MME assessment measures student learning against Michigan high school standards, benchmarks, and core content expectations.

Elementary and Middle School Student Achievement

Figure 19 compares Fall 2007 PSA Grade 3-8 performance with that of the 20 cluster districts and with all traditional public schools. For both ELA and mathematics, data have been aggregated for all six grades to give an overview of the school's performance. This figure shows the percentage of students who met or exceeded state standards. Both PSA and cluster district performance lagged behind traditional public schools, but students in PSAs performed slightly better than students in urban cluster districts.

A comparison of each PSA to its referent district has been included in Appendix C of this document. This comparison does not include the relative number of pupils being tested in each of the schools or account for unique PSA missions/types, but may lend some additional perspective to the charts on the following pages.

Figures 20-23 compare PSA, traditional public school, and cluster district performance in ELA and mathematics for several demographic subgroups: economically disadvantaged students, African-American students, Hispanic students, and students with disabilities.

Each of these groups was of sufficient size to allow for meaningful comparisons. In the fall of 2007, each of these subgroups showed higher proficiency in PSAs than in urban cluster districts. African-American students in PSAs performed better than African-American students in all traditional public schools statewide.

Figure 21: Fall 2007 Grade 3-8 MEAP Proficiency for African American Students

Figure 22: Fall 2007 Grade 3-8 MEAP Proficiency for Hispanic Students

High School Student Achievement

Figure 24 shows that PSA high schools, in the aggregate, did not perform as well as cluster districts or traditional public schools on the mathematics and ELA portions of the MME. Again, a comparison of each PSA to its referent district has been included in Appendix C of this document. As mentioned, high school performance is an area in need of targeted, intensive improvement.

As mentioned on page 11, 27% of all PSA high school pupils are participating in alternative education programs. This percentage is noticeably higher than in traditional public schools, and likely has some effect on the aggregated MME scores reported here.

The length of time a PSA high school has been operating has a pronounced effect on student achievement. **Figure 25** shows this pattern of improvement, with schools that have been operating for seven years or more performing significantly better than their newer counterparts.

Subgroup comparisons show that both economically disadvantaged students and African-American students also perform less well in PSA high schools than in cluster district or traditional public school high schools. **Figures 26 and 27** illustrate this.

No comparisons can be presented for Hispanic students or students with disabilities because those subgroups were too small at the high school level to provide for statistically reliable analysis.

Combining Academic and Socio-economic Analysis

Studies indicate the single best predictor of student academic performance continues to be socio-economic status. The charts presented on the following pages blend MEAP and MME achievement results with free and reduced-price lunch data to allow comparison among schools serving similar economic populations.

The scatter plots should be read in two steps. Moving horizontally from left to right across the bottom axis, a reader progresses from relatively prosperous student populations to relatively distressed populations. The figures on the bottom scale represent the percentage of students eligible for free/reduced lunch subsidies and range from 0-100%. At any given point on that scale, moving vertically up the chart, the reader encounters one dot for every school in Michigan whose population fits that proportion of students in poverty. A school's dot is located at the height along the vertical axis at left that indicates the percentage of that school's students who scored proficient on MEAP.

The general pattern of the dot-cluster (falling from left to right) displays a classic negative correlation: the more students in poverty, the fewer MEAP proficiencies. This is true not only for Michigan's traditional public schools (shown in grey squares) and Michigan PSAs (shown in darker, blue diamonds) but also for students across the nation. When the nation does not leave any children behind, the dot-cluster will level out, meaning that children in poverty succeed at the same rate as relatively well-off students, and then rise so that both populations succeed in higher numbers. NCLB's goal of 0% failures by 2014 would be represented on a chart like this with all dots lined up at the 100% top edge of the chart.

Figures 28-31 display the resulting patterns for 3-8 ELA, 3-8 mathematics, high school ELA, and high school mathematics. Each chart is divided into four quadrants by a horizontal and vertical line at the halfway (50%) point.

The schools in the upper right quadrant represent extraordinarily interesting successes – they have succeeded in achieving over 50% proficiency with more than half free/reduced lunch populations.

Few high schools – either PSAs or traditional public schools – are in the upper right quadrant. High school achievement continues to be an area of challenge for all schools, particularly as they adjust to the increased rigor of Michigan’s High School Content Expectations.

As mentioned previously, high school performance is an area of challenge for PSAs and will need to be addressed in the years to come.

Figures 32-33 identify the elementary and middle school PSAs that have one or more school buildings with overall student achievement levels in the upper right quadrant in **Figures 28-31**.

Of particular interest are the consistent results being delivered by the schools in this category. Of the 27 PSAs in the upper right quadrant in 2006-07, 24 repeated their accomplishment a second time in a row in 2007-08. Eighteen have appeared on the list every year since 2005-06. These schools seem to have developed systematic approaches to consistently reach economically disadvantaged pupils; a growing number of other Michigan PSAs are doing so as well.

A number of traditional school districts are also delivering promising results with high-poverty student populations. However, since the scope of this report is limited to Michigan's PSA population, the Department's research and discussion is focused on this group only. The Office of School Improvement is in the process of conducting research into the achievements of traditional school districts in this area and will issue its findings in 2009.

To further explore the strategies being used in the "beating the odds" PSAs, MDE contacted all 52 charter schools in this category to request additional information about the programmatic and instructional approaches they have adopted. The Department also sought to identify any commonalities or extrinsic factors that may be impacting the schools' success in this regard. Through a comprehensive review of school data and records, survey results, staff interviews and site visits, a clearer picture of what is working in these schools has begun to emerge. This information is included in Appendix B of this report.

Michigan “Beating the Odds” PSAs

Each of the PSAs listed below has one or more buildings with student populations that are achieving over 60% proficiency with more than half free/reduced lunch populations. **A similar list of traditional school districts in this category will be issued during 2009.**

Public School Academy	Authorizer	Date Opened	Service Provider (Management Company) (2007-08)

Report Cards / Adequate Yearly Progress

“Adequate Yearly Progress” is defined by the federal No Child Left Behind Act as demonstrating that a school is on track to meet state proficiency standards by 2013-14.

Figure 34 shows the percentage of PSAs, cluster districts, and traditional public schools that made AYP in 2007-08. Charter schools made AYP at a higher rate than cluster districts. The gap between PSAs and traditional public schools closed by six percentage points over the 2006-07 school year. This reflects an improvement of almost 4% on the part of PSAs and a decline of just over 2% on the part of traditional public schools.

If a school does not make AYP for two consecutive years, it is designated by NCLB as needing improvement. Michigan designates these schools “high priority.” If they qualify for Title I funds, they become eligible for additional technical support. If a school continues to not make AYP, its improvement status moves to the next level. As a school moves to each new level, it becomes subject to more stringent requirements and more intensive interventions.

To make AYP, schools must meet the following requirements:

- 1) Attendance rate (elementary and middle schools) or graduation rate (high schools) must be at a minimum of 80% for all students and subgroups.
- 2) Participation rate (the percentage of students who are tested using MEAP or MME) must be at a minimum of 95%.
- 3) The school must meet established proficiency targets in ELA and mathematics for all students. The school can also meet this requirement by reaching “safe harbor,” which is accomplished by reducing the previous year's percentage of students identified as “not proficient” by 10% in each subgroup.

Figure 34: 2007-08 Schools Making Adequate Yearly Progress

Schools which cannot provide sufficient data on student success are placed in AYP advisory status.

Figure 35 shows that PSAs again perform better than cluster districts, having more schools “Not Identified for Improvement” than cluster districts, while traditional public schools statewide performed better still. No charter schools were in Phase 6 or above, but seven were in Phase 4 and two in Phase 5.

The percentage of PSAs in Phases 4 and 5 was roughly comparable to traditional public schools, and lower than cluster districts. Authorizer efforts at intervention and technical support for PSAs in NCLB sanction phases have so far resulted either in turn-around or in school closure before that point.

Education YES! School Report Card Grades

Public Act 25 of 1990 requires that all Michigan public schools receive a report card annually. Currently, that report card is called Education YES!. Schools' Education YES! reports are published electronically on the MDE website, where they are accessible to parents and students. A number of factors are weighted to calculate each school's composite grade. About two-thirds of a school's composite grade is based on achievement scores: ELA and mathematics for elementary schools; and ELA, mathematics, science, and social studies for middle and high schools. Schools complete a self-assessment of 40

performance indicators developed from Michigan's Comprehensive School Improvement Framework. These indicators include Teaching for Learning, Leadership, Personnel and Professional Learning, School and Community Relations, and Data and Information Management.

Figure 36 compares 2007-08 Education YES! report cards for PSAs, cluster districts, and all traditional public schools. Charter schools received slightly more A and B grades than cluster districts, but fewer than traditional public schools.

Attendance, Graduation and Dropout Rates

Both federal NCLB criteria and the state law that mandates this annual report to the Legislature specify that attendance and graduation rates should be tracked. **Figure 37** provides an analysis of attendance rates for charter schools compared to that of cluster districts and all traditional public schools for 2007-08.

Each district (PSA or traditional public school) was identified within one of four groups:

1. Schools with an attendance rate below 70%.
2. Schools with an attendance rate between 70%-80%.
3. Schools with an attendance rate between 80%-90%.
4. Schools with an attendance rate above 90%.

The schools in each group were counted to calculate percentages. They are not weighted by student count. In 2007-08, PSAs experienced higher attendance rates than did cluster districts, but PSAs had a lower attendance rate than traditional public schools.

Buildings with graduation rates were separated into four groups: those with graduation rates less than 70%; those with graduation rates between 70% and 80%, those with graduation rates between 80% and 90%; and those with graduation rates above 90%.

In the 2007-08 school year, PSAs and cluster districts both experienced lower graduation rates than traditional public schools. PSAs had higher graduation rates than cluster districts.

School dropout rates were separated into five groups: those with dropout rates less than 10%; those with dropout rates between 10% and 20%, those with

dropout rates between 20% and 30%; those with dropout rates between 30% and 40%; and those with dropout rates above 40%. As **Figure 39** shows, PSAs experienced mixed results in this area during 2007-08.

PSA Financial Performance

Comparisons of financial information are more useful among PSAs than they are between PSAs and other public schools, since PSA revenue and expenses differ from traditional public schools in several ways which make comparisons difficult:

1. Foundation allowance to PSAs are tied to geographic districts, but capped.
2. Since PSAs lack taxing authority to raise funds for capital investments, they finance facilities from operating funds.
3. Competitive start-up grants are available to PSAs in their first three years of operation.
4. PSAs often offer fewer optional services than traditional districts (e.g., transportation, meals, nurses, counselors).
5. PSAs that contract with a service provider (management company) to hire staff are prohibited from participating in the Michigan Public School Employees Retirement System and instead fund alternative retirement plans.

The following charts compare PSAs to both cluster districts and traditional public schools wherever feasible, but these differences in underlying systems should be kept in mind when reviewing information.

Revenues

Figure 40 compares revenue sources for PSAs with all traditional public schools and with cluster districts. Both PSAs and traditional public schools receive state-funded foundation grants; PSA foundation grants are tied to the local

traditional school district in which they were originally located, but were capped at \$7,385 during 2006-07, the most recent year for which data are available. The chart shows weighted averages for each type of school. Each PSA and traditional school district's foundation grant is multiplied by the number of students to which it applies; the sum is then divided by the total number of pupils involved. The PSA average is \$519 below the cluster districts' weighted average and \$126 below the traditional public school districts' weighted average.

PSAs, like traditional public school districts, are eligible for additional “categorical” and competitive federal, local, and state funds. These funds are for designated purposes such as supporting state at-risk, special needs, early childhood, and bilingual students. Per pupil averages, again weighted by the number of students in each school, are shown, along with cluster district and traditional public school district tax revenues, which these districts can borrow against to finance facilities. In 2006-07, with an average of \$9,402 per-pupil revenues, the PSA average is below traditional public schools by \$535/pupil, and below cluster districts by \$1,778.

Figure 41 shows total state aid to each of the three categories of schools year by year since 2002-03.

Fiscal Stability

Michigan's charter school statute requires PSAs to maintain (and directs MDE to report on) “fiscal stability.” While school districts traditionally use fund balance as a proxy for stability, that number is less meaningful for PSAs since substantial startup expenses during the first few years of a PSA's existence distort those numbers, and since some PSA boards' contracts with their service providers (management companies) espouse alternative approaches to fiscal stability that do not rely on fund balance reserves. For instance, boards that hire National Heritage Academies to manage their schools receive a commitment that in exchange for retaining any surpluses (thus reducing fund balances to zero), the management company will absorb any deficits, including startup expenses. On the other hand, boards that decide to own their facility often spend several years amassing larger than traditional fund balances in preparation for construction or purchase. Yet other PSA boards are philosophically committed to not accumulating fund balances, since PSAs' leaner allowance of per pupil operating funds demands that every available dollar be spent during the year in which it becomes available.

These are some of the reasons PSA fund balances tend to be lower on average than traditional public school districts' fund balances, at about 5% rather than the 11-15% typically held by traditional public schools (**Figure 42**). PSAs generally approach more traditional fund balances as they age, as **Figure 43** shows for the 144 PSAs over six years old.

Figure 44, showing each school's fund balance, is a much-reduced version of information that MDE makes available to PSA boards so they can compare their own school to other PSAs in Michigan. Because PSAs face similar financial challenges and conditions, this intra-group comparison can be more helpful to boards than inter-group comparisons with cluster districts and traditional public schools, providing a basis for productive self-evaluation and for conversation with service providers (management companies).

Expenses

Comparisons of the percentage of current operating expenses devoted to instruction at PSAs and traditional public schools must consider facility lease and purchase costs that come out of PSA operating expenses. Conversely, most traditional public schools incur expenses for services that many PSAs do not provide, such as transportation, meals, athletics, and co-curricular activities. In addition, PSAs also serve fewer students with special needs.

For these reasons, direct comparisons must be made cautiously.

Expenditure Categories:

- Instruction - including special education classroom services
- Instructional Support - Support Services, such as speech therapy, counselors, library services, and nurses
- Administrative Support - Support Services, including business operations, facility operations and maintenance

Figure 45 shows that PSAs spend a lower percentage of operating expenses on instruction.

Figure 46 is another chart MDE makes available to charter school governance boards to allow each board to see how its use of funds compares with other PSAs; this information can be used as a basis for conversations with service providers (management companies) and school administrators. This chart is included here to illustrate the wide range in the percentage of operating funds dedicated to instruction among PSAs.

Teachers' Salaries in Public School Academies

Salaries for PSAs' teachers in 2006-07 averaged \$39,334, \$16,192 less than Michigan's average salary of \$55,526 statewide. Other data suggests that one contributing factor for the discrepancy is that teachers in PSAs are relatively new, rather than veteran, teachers. **Figure 47** shows the distribution of salaries at all 232 PSAs.

Service Providers (Management Companies)

As mentioned previously, PSA boards in Michigan are permitted by statute to contract with service providers (also known as management companies) to purchase services involved in running their schools. A majority of Michigan PSA boards have opted to hire a service provider (management company) for portions of their work. These contracts range from facility management to staff and personnel management, accounting and payroll, curriculum development, and professional learning services for administrators and/or teachers. As described on page 13 of this report, some service providers (management companies) offer a full range of day-to-day management and support, while others provide only one or two specific functions on behalf of a school.

The 53 service providers (management companies) contracted by Michigan PSAs were presented in **Figure 18** on page 13 of this report. A number of questions about these service providers (management companies) and how they spend their funds have been raised, with some interest in increased accountability and transparency.

Many aspects of service provider (management company) spending are already reported through their schools' data submissions to the state. Michigan's Center for Educational Performance and Information (CEPI) maintains academic, personnel and financial information about each of the service provider (management company)-managed schools, just as it does for all other schools. Review of this information presents some initial expenditure and teacher salary data. More research is needed to determine what other findings can be gleaned through a careful analysis of information that has already been reported and made publicly available.

Figure 48 displays instructional percentages reported by all schools that hired the same service provider (management company) to illustrate the wide range of expense patterns in place.

Figure 49 on the next page displays teacher salaries, sorted into clusters of PSAs whose boards have hired the same service provider (management company). Again, an expanded version of these charts ranks individual PSAs and allows each PSA board to see where it fits in the range of Michigan charter schools. MDE is working to make this information available to PSA board members as a tool for their deliberations as they choose whether to hire a service provider (management company) to manage part or all of their operations.

Figure 49: 2006-2007 Average Teacher Salaries for PSAs Using the Same Service Provider (Management Company)

Figure 50 shows a list of the PSAs that had financial deficits in 2007-08. PSAs represented six of the 27 Michigan schools in this category. In general, their deficits were smaller than traditional public schools, totaling \$231,404 on average compared to the traditional public school average of \$7,975,406.

Figure 50: PSAs with Deficits Reported for 2007-08

School	Authorizer	Service Provider (Management Company)	Balance
Hillsdale Preparatory School	Hillsdale ISD	CS Partners	-\$6,282.30
Walden Green Montessori	Central Michigan University	Advance Educational Services	-\$115,769.00
Victory Academy Charter School	Bay Mills Community College	Global Educational Excellence	-\$28,340.00
West Village Academy	Central Michigan University	Transitions Consultants, LLC	-\$624,656.15
Discovery Arts & Technology PSA	Bay Mills Community College	Mosaica Education	-\$428,269.93
Northpointe Academy	Highland Park City Schools	Evans Solutions Management Company	-\$185,109.00
			-\$1,388,426.38

Recommendations

The opportunities and issues described in this report point to a PSA sector that is becoming more mature and fully integrated into Michigan's educational landscape. While overall performance and quality still need to improve - particularly at the high school level - PSA performance continues to make progress and the current statutory framework is capable of delivering solid results. As a sector, PSAs in Michigan are making strong advancements relative to educating both economically disadvantaged and minority students and generally offer positive alternatives to families seeking a choice.

MDE's recommendations are designed to strengthen the PSA sector still further to ensure greater consistency and quality among all charter schools. The results produced to date indicate a limited need for statutory revisions; the law appears to be working well to support school and student achievement.

The following recommendations, therefore, reflect broad policy and practical suggestions that will hold Michigan's PSA sector to continued high standards of accountability.

Recommendations to the Legislature

PSA Location /Facilities Issues

As Michigan's PSA sector has matured, issues have arisen relative to the establishment and relocation of new charter school sites. Some PSAs have moved out of the communities in which they were originally established, raising both practical and policy concerns about how site decisions are made.

Members of the SBE also have questions about how the specific characteristics of various PSA projects, such as school location, can change from the time of charter application to the issuance of a charter contract, and how such contracts can be amended and interpreted after their issuance. There is a strong interest in ensuring that such changes are adopted only after careful consideration of their impact on local communities, families and students.

The SBE believes that it is necessary and appropriate to develop strong guidelines relative to PSA contractual changes, particularly as they relate to school location and facilities. The Legislature is asked to provide the department charged with overseeing school building approval issues with the **authority to promulgate rules** that would establish processes and criteria for selecting and developing school locations and sites.

MDE Staffing

Adequate resources are needed to ensure continued strong monitoring of PSA compliance and performance. Enhanced staffing capacity is also necessary to ensure continued MDE compliance with federal regulations for Charter School Program grant recipients. Additional GF/GP support will allow for appropriate monitoring of charter schools, proactive leadership, and effective administration of the state's PSA program.

An **additional allocation of \$225,000** would support a 3.0 FTE equivalent staffing enhancement. These three positions would be at the analyst/specialist level and would leverage existing staff relative to all of the following efforts and activities:

- PSA support, monitoring and site visits
- Authorizer dialogue and site visits
- Grant administration
- Research projects
- Other new activities described in this report (see “MDE Action Items” below).

The SBE wishes this item to be considered in the FY 2010 budget.

As other issues arise that require legislative clarification, the SBE will bring them forward for dialogue and consideration.

MDE Action Items

The following action items will be accomplished at the MDE staff level, to the extent possible. Additional financial resources will help ensure the effective implementation of each recommended action item.

School Accountability

Accountability and transparency for all public schools is a primary objective for the SBE. MDE staff have been asked to help provide simple, uniform report cards that all schools can provide to students and families. These report cards would compare the performance of a given school to other schools in the geographic region, as well as to statewide averages. The SBE recommends that parental input be sought into the design of these documents.

Leadership Resources

MDE is working to deepen the connection between the charter and traditional school communities through administrative information sharing and support. This type of information sharing and collaboration may be useful in the development of effective school leadership for **all** public schools.

MDE will **establish a task force** comprised of groups in both the traditional school district and PSA sectors to determine how to bolster communication among the two sectors and what types of information resources would be most helpful.

In particular, the task force will help **finalize and distribute a toolkit** for traditional public schools that are considering chartering as a potential restructuring alternative for buildings in advanced stages of NCLB sanctions. By the end of this year, MDE will issue materials and resources to help school leaders determine if this is a viable option to pursue.

High School Student Achievement

High school student achievement among charter schools continues to need improvement. With the relatively new Michigan Merit Curriculum and constantly rising federal accountability requirements, PSAs and traditional public schools alike need to improve their performance as quickly as possible, lest they fall even further behind. Currently, there are 109 PSAs offering some grades of high school; as their secondary capacity continues to grow it is essential to ensure they have the tools and resources they need to succeed.

The knowledge gained through a review of the “beating the odds” schools identified in Appendix B may drive school improvement efforts at the secondary level. However, more work is needed to identify strategies for high school success. MDE staff will **convene a study group** to formulate more specific recommendations relative to improving high school performance.

Assurances and Verification

For several years, Michigan authorizers have voluntarily participated in a pilot “Assurances and Verification” project in which they demonstrate their systems for complying with the requirements set forth in statute. As described in this report, the outcomes of these reviews have been generally positive.

At this time, the Assurances and Verification project needs to move past its pilot stage and develop into a lasting system for ensuring authorizer quality. MDE staff will **formally institutionalize Assurances and Verification** and explore appropriate ways of expanding the project. For instance, exploring precisely how Michigan authorizers are accomplishing their oversight and support objectives may show how different approaches to this work can enhance school and student achievement.

Collaboration between MDE and the Michigan authorizer community has been productive and consistent to date. However, should Michigan’s authorizing community elect not to participate cooperatively in this important MDE initiative, formal criteria may be needed to provide an objective basis for moving forward. In those circumstances, MDE will recommend the Legislature assign to MDE the authority to promulgate rules that establish standards and criteria for authorizer performance.

Areas for Future Exploration

Service Provider (Management Company) Transparency

As mentioned previously, many questions have been raised about service providers (also known as management companies) and how they use their funds. Some interests argue for increased transparency and accountability on the part of service providers (management companies), citing legitimate public interest in knowing how much they earn in their work for public schools. Other interests argue that as long as the PSA is performing well, the profit margin for a service provider (management company) shouldn’t matter. Still others contend that private firms providing either PSAs or traditional public schools with services and products, such as janitorial or food services, are not expected to report their profit margins and question why service providers (management companies) should be singled out for public reporting.

Fundamental to the issues of accountability and transparency is equity—between PSAs and traditional schools, as well as among private companies working with either or both. No matter the service or product provided by a company, public disclosure may help all preK-12 boards demonstrate the value of their service agreements to the public.

Any policies or legislation regarding these issues should provide equitable treatment of all service providers working in preK-12 education, and accurately reflect the relative scope of services being provided. A service provider (management company) that exercises greater control over a school’s daily operations, for example, may require a different type of scrutiny than one that is merely providing one or two isolated and discrete services.

The SBE will continue to explore and discuss these issues in the coming year, with an eye toward finalizing a policy recommendation for the Legislature's consideration.

PSA Location / Facilities Issues

As mentioned on page 38, members of the SBE have questions about how decisions relative to PSA site changes are made. The SBE believes it is necessary to assure that any change in location of a PSA is an open public process that requires review and approval by the authorizer, and accommodates the needs of local communities, families and students.

Additional exploration is being done to determine the most effective procedures for handling site change requests. More information and a specific recommendation will be provided during the coming year.

Windup and Dissolution

Progress is being made on the ongoing issues of windup and dissolution. MDE has worked with authorizers to dissolve the operations of closed charter schools and return all outstanding assets to the state. Authorizers and school leaders are demonstrating their commitment to ensure that closures are handled appropriately. MDE will continue to identify administrative solutions to these issues.

Research Concepts to Pursue

In the future, MDE will pursue specific research on topics of interest to the State Board of Education and the Legislature. Subjects under consideration for research include:

- Tracking of student mobility data and patterns among all public schools
- Service provider (management company) accountability
- Student safety in PSAs
- How PSAs are addressing the new high school graduation requirements
- Post-graduation trends among PSA students

Appendix A

Glossary

Glossary

Alternative Education Program

Alternative education is a program operated as a subdivision of the regular K-12 program. It is designed for students who can be better served in an alternative delivery system. Alternative education pupils are funded under the K-12 foundation rate. Students served include those who have special needs and are lacking sufficient credit to graduate with their class. Alternative education programs often include expanded services from the regular program such as counseling, childcare, and transportation.

Attendance Rate

The percentage of total school days that students in a school or district are present in school.

Authorizer

A public institution identified in Michigan statute as able to issue a contract to organize and operate one or more public school academies. Michigan law recognizes local school districts, intermediate school districts, community colleges, and public universities as authorizers.

Adequate Yearly Progress (AYP)

The measure specified in the Elementary and Secondary Education Act (ESEA) for use in holding schools and districts responsible for student achievement in English language arts and mathematics. AYP is based on Michigan Educational Assessment Program (MEAP) test results, participation rates in MEAP testing, and attendance or graduation rates.

Categorical Funding

Support from the state and federal governments that is targeted for particular categories of children or families, special programs and special purposes. This money is granted in addition to school districts' general purpose revenue, and it almost always has restrictions on its use.

The Center for Educational Performance and Information (CEPI)

Michigan state agency in DMB charged with collecting and reporting data about Michigan's K-12 public schools.

Cluster District

One of the 20 Michigan school districts that have three or more PSAs within their boundaries. This year's cluster districts include: Ann Arbor, Benton Harbor, Dearborn, Detroit, Flint, Grand Rapids, Hamtramck, Highland Park, Holland, Inkster, Jackson, Lansing, Midland, Muskegon, Pontiac, Port Huron, Saginaw, Southfield, Taylor, and Wayne-Westland. For purposes of this report, cluster districts comprise a subset of "all traditional public schools" reflecting areas where PSAs are in relatively high demand and it is useful to separate out their data for baseline comparisons.

Dropout Rate

Total number of students who left high school permanently at any time during the four-year cohort period, or whose whereabouts are unknown

Education YES!

The state accountability system used in Michigan to determine how well a school is performing based on MEAP results and other school characteristics. Each school is graded on its MEAP achievement and MEAP improvement, as well as 11 other performance indicators, such as engagement, instructional quality and learning opportunities.

ELA

Acronym for English Language Arts

Elementary and Secondary Education Act (ESEA)

The principal federal law affecting K-12 education, sometimes referred to a “No Child Left Behind” or “NCLB” during the administration of George W. Bush.

Foundation Grant

State-funded revenues received by schools on a per-pupil basis. The foundation grant is the basic amount allocated by the State to local education agencies and PSAs through the State School Aid Act. PSA foundation grants are tied to the local traditional school district in which they were originally located, but were capped at \$7,385 during 2006-07, the most recent year for which data are available.

Free / Reduced Price Lunch (FRL)

Children whose families have income of 130% or less of the Federal poverty guideline as well as those who receive food stamps or Temporary Assistance for Needy Families (TANF) are eligible for free lunch. Those whose families have incomes from 131% to 185% of the poverty guideline are eligible for reduced-price meals. For purposes of this report, FRL is used as a proxy for economic status.

FTE

An individual pupil's pro rata share of school membership pursuant to the State School Aid Act. In no case may a pupil generate more than 1.00 FTE. The total number of FTEs in a school is used to determine membership for purposes of awarding state aid.

Fund Balance

An amount of money retained in a PSA or traditional school district's general operating fund after all expenditures are made.

Grade Level Content Expectations (GLCE)

The Michigan framework for grade-by-grade assessments in grades K-8, which offers teachers a guide for their instructional and curricular emphases in classrooms. GLCEs provide greater clarity for what students are expected to know and be able to do by the end of each grade.

Graduation Rate

In order to comply with The No child left Behind (NCLB) Act of 2001 and, as defined in The Michigan Department (MDE) Consolidated State Application Accountability Workbook, the state of Michigan has moved to an accountability system for high schools in which a graduation rate includes only "on-time" graduates who earn diplomas in four years. This calculation aligns with the guidelines provided by the National Governors Association (NGA) Graduation Counts Compact. The "four-year adjusted cohort graduation rate" is calculated by tracking individual students from the time they were enrolled as first-time ninth-graders, with a four-year expected completion rate. The formula accounts for students who leave school and return later, for students retained in a grade and stay in school, and for students who transferred into and out of the public school system. Thus, this is a more accurate measure of the Graduation rate. Students included in building rates must have been reported to the state for two or more count days. Students included in district rates must have been reported to the state for one or more count days.

High School Content Expectations (HSCE)

The Michigan framework for grade-by-grade assessments in grades 9-12, which offers teachers a guide for their instructional and curricular emphases in classrooms. HSCEs provide greater clarity for what students are expected to know and be able to do by the end of each grade.

Michigan Educational Assessment Program (MEAP)

An annual assessment given to students in grades 3-9 based on Michigan Curriculum Framework.

Michigan Merit Examination (MME)

The 2007-08 Michigan Merit Examination (MME) assessed students in grade 11 and eligible students in grade 12 based on Michigan high school standards. For 2007-08, it consisted of three components:

- ACT Plus Writing® college entrance examination
- WorkKeys® job skills assessments in reading and mathematics
- Michigan-developed assessments in science, social studies, and writing

Public School Academy (PSA)

A PSA is a state-supported public school, also known as a charter school, authorized pursuant to Part 6A of Michigan's Revised School Code. According to Section 380.504(4), "A public school academy may include any grade up to grade 12 or any configuration of those grades, including kindergarten and early childhood education, as specified in its contract."

School Report Card

A public reporting tool utilized as part of Michigan's Education YES! accountability program. Each Michigan school is graded on its MEAP achievement and MEAP improvement, as well as 11 other performance indicators.

Service Provider (Management Company)

A private organization that contracts with a PSA board to deliver various school staffing and support functions, which may include facility management, personnel management, payroll and accounting, curriculum development, and professional development services for staff and teachers. In some instances, a service provider (management company) may be used to manage the entire operations of a school.

Strict Discipline Academy

A Michigan school chartered under Public Act 23 of 1999 to serve suspended, expelled or incarcerated young people.

Traditional Public School

An elementary or secondary school in the United States supported by public funds and providing free education for children of a community or district.

Urban High School

A Michigan school chartered under part 6C of the revised school code to operate within Detroit.

Appendix B

“Beating the Odds” Research Findings

PSAs “Beating the Odds”

As described beginning on page 18 of this report, 52 PSAs in Michigan have succeeded in achieving over 50% proficiency with more than half free/reduced lunch populations

The general characteristics of the 52 schools vary widely. They are located in urban, suburban, and rural areas all across the state, from Detroit to Alpena to Benton Harbor. They use a variety of grade configurations across PK-12 and have student populations that differ in terms of their relative size and demographic makeup. Their philosophies, programming, and instructional approaches are all unique. Some use the services of an service provider (management company), while others are self-managed. Their instructional spending levels and financial circumstances are dissimilar. A broad array of different authorizers is represented.

In short, there are few, if any, external circumstances or structural commonalities to which these schools' success can be immediately attributed. MDE looked for programmatic commonalities to explain which practices are most directly responsible for the success of these schools. These findings are discussed below.

Clear, Consistent Approaches

The 52 “beating the odds” schools use different theories and practices to guide their teaching and learning. On the surface, explaining how such dissimilar approaches can deliver comparable levels of student success seems difficult.

However, each school has carefully developed an instructional program consistent with the unique needs of its student population. Each school demonstrates a clear understanding of the state's GLCEs and HSCEs and, through a strategic review of relevant data and other staff, parent and student feedback, the school understands its student population thoroughly. These schools have fully and honestly explored their current needs and realities through a careful review of hard data and then developed programming that is deliberative, highly responsive, and effective at transitioning them along the path toward success. These schools do not question that **all** students are able to attain mastery of these core skills, given the right tools.

Some representative comments from “beating the odds” schools:

- *Kids are kids, some just have a better home life with a greater exposure to knowledge. You have to take them from where they are at when they come to you and build on their strengths and work on their weaknesses. (William C. Abney Academy, Grand Rapids)*
- *One lesson that stands out above the rest is the importance of teachers gaining an understanding of each individual student's situation (their story) without allowing that situation to lower their behavioral or academic expectations. Instead, that information should be used to fill in the gaps with resources that may be useful in helping the student obtain expected goals. (Hamtramck Academy, Hamtramck)*
- *... Every child at Arbor Academy is assessed and a service plan developed for each curriculum area. Our systems provide for day by day tracking of every objective in every academic area for each child. Teachers, administrators, and parents can view and review student progress and the special services plan for each student. Each Monday parents review the weekly progress plan for their child and on Friday a weekly accomplishment report is provided to the parent. (Arbor Academy, Battle Creek)*

As student populations vary among these schools, so do the approaches being used. However, each of these schools ensures that teachers and staff understand where their students are, know where they need to go, and do the hard work of getting them there.

Each school MDE interviewed is heavily focused on core skills. While special courses are offered in non-core subject areas, they are not emphasized to the same degree and some schools say they will actually require students to drop special courses temporarily if they are failing to perform well in basic subject areas. Additional time may also be provided through an extended school year or through extended study periods in core areas.

- *Proficiency has been increased by allowing extended time for ELA and Math. Extra time allows for remedial work as needed. The emphasis on GLCEs ensures that teachers focus on necessary skills. (Academy of Southfield, Southfield)*
- *The biggest tool we have implemented was in our shift to a balanced school calendar (some would refer to this as year-round). This has enabled us to reduce the period of time each child is out of the classroom, which helps eliminate learning loss from extended periods absent of instruction. (Ridge Park Academy, Kentwood)*

The schools have been very intentional about the speed with which they introduce, implement, and discard changes to their programming. They gather considerable evidence before adopting new programmatic elements and work to integrate such research-based elements carefully into their daily activities. They say they evaluate constantly and carefully adjust as evidence dictates, moving with purpose at all times and never taking their eyes off the ball. These successful schools indicate they are not easily distracted by the latest trends in K-12 education and they do not change approaches rapidly; rather, they provide stability and consistency for staff and students through a series of practices they consider tried and true relative to their school populations. New elements may be added over time, but only after considerable strategic deliberation.

Some representative comments from schools:

- *We don't change, not really. While we might tinker around the edges in response to other factors, we know we're doing the right things and it's in our students' best interest for us to stay intent on our goals. (Detroit Service Learning Academy, Detroit)*
- *At the start of each school year, each teacher gets a playbook of what we are going to be doing and when. We stick to that playbook so that everyone knows what to expect. (Dove Academy, Detroit)*
- *We have worked carefully to develop highly detailed schedules and plans for how each GLCE is going to be introduced, taught and assessed. We have it down to the exact date, so we can be absolutely certain we stay on track with our students. (Vanderbilt Academy, Holland)*

This level of relentless consistency appears to be among the most significant elements of the work going on in these schools. Keeping a constant objective in mind and utilizing stable approaches for addressing that objective not only supports strong organizations, but also provides reliability for stakeholders working with the school. The principles of transparency, reliability, and continuity are important not only for the organization itself, but for populations that may face high levels of financial or other uncertainty. Consistent, fair and long-standing objectives and expectations appear to be very helpful in building trust and supporting parents, staff, and school leaders alike as they work to drive strong performance in their students.

Effective Utilization of Data

Each of the 52 “beating the odds” schools is using student assessment data in intriguing ways. By developing a clear understanding of how each individual pupil is performing, teachers are able to better structure and differentiate their instructional approaches on an ongoing basis. Successful PSAs are doing diagnostic testing and analysis in September so they can better plan, predict, and address each student’s academic development all year long.

- *Data is the foundation of our success. By understanding how our students are doing and by examining our instructional delivery we can be more efficient and effective. Formative assessment has been an effective tool, as it allows us to determine what each student needs in order to meet grade level achievement. [We work to] provide each teacher with a better understanding for what lower and upper level peers are teaching, which enables the teacher to adjust their curriculum so it is in line with what their incoming students already know and what they are expected to know in the next grade. (Detroit Merit Charter Academy, Detroit)*
- *It’s important to determine the initial learning level for each student – it’s difficult to help them improve without knowing where they are starting from. Many disadvantaged students haven’t been exposed to the same experiences as other children, so we need to fill in the basic gaps...to achieve our current level of success, [we must] continue to have students tested before school starts. This will enable us to place students of similar levels together and provide teachers with info they can use to plan ahead of time. (North Saginaw Charter Academy, Saginaw)*
- *I have my thumb on student data at all times; that level of knowledge makes all the difference in the world for me and for the entire staff. (International Academy of Flint, Flint)*

How this early assessment is conducted varies among schools. In some cases, the PSA authorizer provides leadership and funding for student assessment and data tracking; in others, the schools have developed their own tools. How these schools respond to and utilize their data is similar. Once they have diagnostic assessment results in hand, they combine the scores with staff feedback, parent insights, and all other available information to develop a clear picture of where each student is performing. Teachers and specialists then plan and provide a program of instruction that is designed to help address the unique needs of each pupil. Some of the “beating the odds” PSAs group students together by ability; others schedule special interventions for pupils in need of extra help.

- Detroit Merit Charter Academy groups students based on assessment results and teacher feedback. Pupils are placed into three different groups according to their academic performance and may move among classes as their skill levels change. Teachers encourage students to move to the highest-performing group, while students who are already in the top class may move out to get extra help if necessary. This approach appears to be effective in motivating students while differentiating instruction more readily.
- New Branches Academy in Grand Rapids uses individualized reading and math interventions to provide extra help to children in need of academic support. Assessment data provide diagnostic information that is then used to offer targeted support. The school has a room filled with small individual cubicles, instructional tools, and qualified staff who are prepared to interact with students one-on-one so they can improve their performance more rapidly.

This strong emphasis on data is offering schools an ability to have greater certainty about the instructional approaches they use, both on a global and individual basis. Schools are able to evaluate programs quickly and change direction as needed. For teachers, good data can be a powerful tool in planning and differentiating their lessons.

- *Assessment results are thoroughly reviewed and shared by all members of the staff. Action and improvement plans are immediately put in place to ensure that areas of improvement are addressed, the high priority items are reflected upon, and planning is in place to address those areas and meet our students' needs. Assessment results are disaggregated by our Coordinator of Assessments and administrators and shared with teachers to impact the teaching in the classroom. Professional development is also provided to all instructional staff to ensure their ability to read and understand the assessment results and use them to positively impact teaching and learning. (Star International Academy, Dearborn Heights)*
- *We do have a strong sense of how our students are doing, and we keep abreast of how other schools in our area are performing, too. It helps us know what our strengths are and where we need to push. (International Academy of Flint, Flint)*

In addition, data are also being used to provide merit pay for teachers. At Detroit Merit Charter Academy, for example, a growth model is used to determine how much progress each student made in a given year. The goal for staff is 1.4 years of progress in a single academic year. Most staff members attain this goal and receive financial benefit for their efforts. Without this type of disaggregated data in hand, such performance pay programs would be far more difficult to administer.

Leadership

When asked what they do to help support their high-poverty populations, school leaders in the “beating the odds” PSAs almost unanimously reply, “Whatever it takes.” The work of assessing, analyzing, and improving student performance cuts across the entire school organization, but requires particular leadership at the classroom level. MDE survey responses from these schools ranked instructional delivery and instructional leadership as the most important factors in their schools’ success with high-poverty students.

One administrator told MDE that “the days of closing the door to your classroom and becoming king or queen of your own empire are over.” Teachers in these schools appear to be building strong connections with each other and with their administration to share ideas, discuss areas of concern, and develop solutions as problems arise. Staff members working in the same grade level or subject area meet often (weekly or more) to ensure they are on track with each student’s overall progress. What’s more, teachers often share ideas among grade levels to ensure continuity in the curriculum and bolster instructional success. For example, a seventh grade teacher will receive comments from a colleague working in the eighth grade regarding student performance trends so that the seventh grade program can be strengthened down the road.

- *Our Principal and Academic Coordinator monitor all areas of instruction to ensure that the teachers and students are working as a group to bring a quality education to all. Mentoring and peer observation are part of the school culture. Regular grade level meetings are scheduled so teachers discuss their instruction and how it can be tailored to meet students’ individual needs. ... During these meetings we look at data, discuss new strategies, talk about our students, and share best practices. As a K-12 building our staff also meet with content level teachers. This not only made the whole staff cohesive and able to work as a team, but also used the very rich resources in every teacher in the school and made them look at each other as experts in different areas. (Central Academy, Ann Arbor)*

- *Our solutions team has provided our economically disadvantaged students with an assembly of educational professionals made up of the leadership team, office of special education, and teaching staff to analyze the situation of each student brought to it. This group provides problem-solving opportunities, resource suggestions, a plan of action as well as the critical follow-up opportunity for each student and parent referred to this body. (Detroit Academy of Arts and Sciences, Detroit)*
- *I have staff members in my office daily asking questions about how we can help a particular student grasp a concept a little better. Part of my role is to help problem-solve from behind the scenes without getting in the way, and I think the teachers here appreciate having that extra level of support. (International Academy of Saginaw, Saginaw)*

Teachers in these schools are accountable to each other as well as to the students they serve. They have a strong ownership in the school's overall mission and are aware of their role in its future success. Organizationally, this shared leadership and transparency within the classroom are making a difference in how teachers approach their work. They bear a strong sense of responsibility for being the ultimate delivery mechanism for high-quality instruction.

Teachers also appear to be empowered to recommend changes and offer suggestions for fine-tuning instructional delivery. Empowerment provides teachers with additional opportunities to respond to student needs and become involved in school leadership.

- *Teachers have a structured curriculum – but one that is flexible and not micro-managed. ...the staff feels it is very important to incorporate instruction that caters to all of the different learning styles of our children. (Conner Creek Academy East, Roseville)*
- *Our staff is very active in recommending ideas that will help improve teaching and learning. If one teacher is struggling in a particular area, they have a group of willing colleagues standing by to provide ideas and support. (International Academy of Saginaw, Saginaw)*

Teachers in these schools often take on additional leadership responsibilities (e.g., literacy coach, curriculum specialist) to support the overall mission of the school. Even in cases where this has not occurred, teachers in each of these 52 schools volunteer their time outside the school day for extra help, tutoring, and parent outreach in support of their students' performance objectives.

- *Teachers hold after school tutoring for students every day after school to assist them with their academic needs and ensure that continuous support is available. (Star International Academy, Dearborn Heights)*

Many of the schools use paraprofessional staff to support their Title I pupils more effectively. This allows for more personalized attention for students in need of extra help and helps build strong staff connections and relationships. As paraprofessional staff members become certified teachers, they are frequently hired by the school to serve in this capacity. Schools say this helps foster staff continuity and ensures new teachers can "hit the ground running" relative to school programming and expectations.

Many of the administrators have also taught at the schools they are now leading. They appear to have strong histories with the school and are cognizant of their part in maintaining a strong core vision and strategic approach.

Working at Culture

The “beating the odds” PSAs emphasize the need for a solid school culture. They describe very deliberate and effective efforts in this area and rank it as the third most significant element in their success with high-poverty pupils.

One of the chief indicators of school effectiveness in this regard is the frequency with which staff report, “You can tell the new students when they come in, as it takes them some time to adjust to our expectations and culture. They stick out for a while.” School leaders appear to be weaving disciplinary, social, and academic expectations together to create a school culture that fosters student success.

- *All students are truly accepted for who they are, by both staff and fellow students. This translates into a safe and caring environment that students value and defend vigorously. Consequently, the negative variable of economic status is neutralized and even the lowest performing students begin to realize their potential. (Da Vinci Institute, Jackson)*
- *We have learned that learning requires a safe, secure and nurturing environment. We try to provide a family atmosphere...our school culture is open, accepting, warm, upbeat and achievement focused. Staff are hired to reflect the composition of the student population as closely as possible with respect to race and the language spoken in the home. Next, staff are trained to be sensitive to and respectful of the norms of various groups. (Academy for Business and Technology, Dearborn)*
- *Administration as well as staff members have been able to establish the culture that we are here for one objective; it is to meet the need of the child. A visit to the school in the early morning while students are coming off the bus or from their parents' cars would be a very good example to show that students look forward to meeting the staff and administration. When they run out of the car to hug the principal or greet him, it shows that they ARE aware of the caring culture that has been established for them. (Central Academy, Ann Arbor)*
- *You must understand and accept the culture of the students you are teaching. Building a relationship with each student is important to not only teaching, but also to reaching them. (Vista Charter Academy, Wyoming)*

Expectations appear to be very high for students, families, and teachers alike. These schools report that they allow no excuses for low performance; every child can learn given the right tools. Using sound data and clear, consistent approaches, these schools are working to make it happen. By developing a healthy, supportive school culture, they are able to communicate this fact to all stakeholders in their community every day.

Addressing Non-Academic Challenges

How schools help economically disadvantaged students set aside their personal concerns so that they are ready to begin learning is an enormous area of inquiry. The “beating the odds” PSAs handle this challenge in different ways.

Some PSAs believe that they must first address the personal, non-academic concerns of their pupils in a direct, specific way so students are better equipped to learn. These schools provide personal tools to students to give them a strong belief in themselves, help them respond to tough situations outside of school (e.g., homelessness, incarceration of a parent), and drive them to a future that includes postsecondary education.

- *We serve high numbers of kids whose fathers are in jail or who may be homeless. We spend a lot of time trying to help these students deal with these issues so they can be ready to learn. In one recent case, we took a staff collection to help keep a boy and his mother off the streets when they were evicted from a shelter. The students and their parents know us, they trust us, and we work to get involved and help them wherever we can. (William C. Abney Academy, Grand Rapids)*
- *We have to meet their physical and psychological needs first...Letting students know they are cared for. [We are] very aware of their background and what they are coming to school with. (Cesar Chavez Academy, Detroit)*
- *We have learned that “relationships” are key for students who come from poverty and thus place emphasis on creating warm, welcoming, inviting and supportive - while at the same time challenging - relationships with our students and their families. Once the relationship is in place, we can focus on the rigor and relevance that are also critically important. (Waypoint Academy, Muskegon)*

Other PSAs recognize their students' personal challenges but choose not to single them out, believing that a laser-like focus on academics is more appropriate to achieving success. They still focus on physical and psychological needs and give students the tools they need to succeed in school and in life, but their approach is less deliberate.

- *We believe in the research that suggests a minimal role for the economic status in students' achievement. Instead of focusing on this disadvantage, we establish the culture in the school that ALL children will learn; however, we need to work with them based on their individual need regardless where they are economically. We cannot have enough of any programs that can help students in the classroom or one on one. What we would avoid all the time is to keep referring to the students' economic background or status and FOCUS on meeting their individual needs whatever they are. (Central Academy, Ann Arbor)*
- *What makes our school successful is that the adults are in charge. Kids get to be kids. It doesn't matter if you had to get up this morning, dress yourself and your younger siblings, make your own breakfast, find your own way to school – you are a child here. We will care for you and work with you as we work with all our children, to help you learn and grow as you should. We will not treat you any differently because of where you came from, but we will give you the tools all children need to succeed. (Detroit Service Learning Academy, Detroit)*
- *Our culture of learning is all inclusive of our community members. All students are made to feel their work here is important. They feel safe to question or ask for help when necessary. (Plymouth Educational Center, Detroit)*

How a school responds to the non-academic needs of disadvantaged students seems to come back to consistency of approach and a clear understanding of the needs of the student population being served. It is evident that the approach must be unwavering and reliable so that students have a high degree of trust in the school and know what to expect on a daily basis. Inclusiveness, caring, warmth, and positive relationships are all essential to building trust and, ultimately, to achieving academic success.

The Challenge of Parent Involvement

Achieving high levels of parental involvement is an area of concern for all schools, regardless of the composition of their student bodies. The “beating the odds” PSAs have not completely solved the challenge of parental involvement, but they have made strides. By working to understand the students and families they serve, these schools are using targeted strategies that they know will prove most effective.

- *Realizing that for many adults who live in poverty that school was not a ‘safe’ or friendly place for them, first and foremost, we focus our efforts on creating a warm, welcoming, service-oriented environment throughout our building and program. (Waypoint Academy, Muskegon)*
- *Many parents might choose not to be involved not because they don’t care about their children but simply because they (parents) believe that they don’t have as big of a role to play in their child’s life. They don’t feel qualified to partner with the teacher. Therefore, teachers send a very clear message from the first day that parents’ role is crucial and without their help, the school would not be able to help the child. We make them feel that we need their help as the most knowledgeable about their child, they are the experts who are going to help us lead their child to success. We acknowledge the cultural differences, do a lot of parental education and always celebrate their involvement. (Central Academy, Ann Arbor)*
- *At the beginning of each year, we host an orientation program for students and parents. During this meeting, we lay out what we expect of them and what they can expect of us. This helps build a level of trust, as well as a positive and structured school climate that gives order to the school day. Students feel secure and can focus all of their attention on learning, while parents have a greater understanding of their role in their child’s academic development. (Vista Charter Academy, Wyoming)*
- *It is important for us to make sure the strategies we use are appropriate to our population. What good would it do, for example, to use an online newsletter when we have 14 homeless families in our population? We have to make choices that make sense. (William C. Abney Academy, Grand Rapids)*

While these schools have developed approaches that allow them to communicate effectively with parents, many acknowledge it is an ongoing challenge. More must be done to help all schools support high levels of parental involvement and, ultimately, student success.

Managing Regulatory and Financial Issues

The 52 schools that are achieving well with high-poverty populations have the same compliance responsibilities as all public school districts in the state, as well as the financial pressures associated with their capped per-pupil foundation allowance. Managing these issues poses a challenge for these schools; however, they appear to have developed effective strategies for addressing them without losing focus on their primary objectives relative to student achievement.

Many of the schools indicate that they receive compliance help from their authorizer in the form of reporting calendars, reminders, and technical support. Those that use the services of a service provider (management company) say the management assistance they receive helps them stay focused on student results.

When asked what they would change about their financial and regulatory environments, school leaders indicate less paperwork would always be helpful. They do not express a need for more dollars, though they say any future increases or windfalls received would be welcomed and immediately used to offset instructional expenditures.

- *We think compliance is necessary for struggling schools. Schools like ours should not be burdened down with meaningless time consuming paperwork that hinders a leader's time to be in the classroom. (Renaissance Public School Academy, Mount Pleasant)*
- *Teachers would always choose to focus on students instead of paperwork. (Cesar Chavez Academy, Detroit)*

Summary of Findings

In his landmark management book *Good to Great*, author Jim Collins writes that, “You must maintain unwavering faith that you can and will prevail in the end, regardless of the difficulties, AND *at the same time*, have the discipline to confront the most brutal facts of your current reality, whatever they might be.” It appears this is what “beating the odds” schools are doing.

Each of the PSAs is gathering data and using staff input to develop as precise a picture as possible of how their pupils are performing and what their academic and personal needs are. Keeping their core objectives in mind, each school develops a plan of action for moving their pupils toward success. While implementing these plans, the schools work to maximize communication and accountability among all parties – students, teachers, and parents – at all times.

This approach appears to be generating positive results among some of Michigan's most at-risk pupils.

Appendix C

PSA Proficiency Comparison By Referent District

PSA Proficiency Comparison

The following pages summarize PSA performance on statewide MEAP and MME assessments, and compare that performance to the local school district in which the PSA is located (known as the “referent” district). FRL information for each district and PSA is also provided.

Referent districts that are highlighted in black are considered cluster districts for purposes of the data presented in this report.

School Opened: 1997 Current Contract Term: 2001 through 2012

Mission Statement:

In order to find, claim, and create their work in the 21st century, young people must be educated for self-directed initiative; they must demonstrate compassion and empathy for others; and they must become highly flexible in their thinking. The educational mission of Detroit Community High School is to lead students to develop these crucial skills and capacities so that they will be able to find their place and purpose in life.

Life Skills Center of Pontiac

Grades in 2007-2008: 9-12, Alt, Spec

School Opened: 2004 Current Contract Term: 2004 through 2012

Mission Statement:

To save at-risk students by giving them a second chance at obtaining a quality education and vocational training and placement, thereby guiding them on a path to success. This mission will be served by providing the Center's students with an individualized and self-paced program set in a flexible scheduling environment that is responsive to its students' needs and by providing an education experience that leads to a high school diploma (not a GED) and full-time employment.

Academy Comments:

♦The Academy, operating in a juvenile detention/intervention center, aims to help adjudicated youth reenter their school and community while keeping the family intact. The Academy is temporary intervention providing a "second chance" for students incarcerated by the juvenile court system.
♦Average length of enrollment: 5-9 months.
♦Academic goals are: increased reading and math skills, and credit recovery while completing the County Residential Youth Treatment program supervised by the court system.
♦Average enrollment: 100 students
♦Each student is evaluated through testing and examination of past school records. A comprehensive educational plan is designed to best meet each student's academic needs.

Academy Comments:

♦The Academy aims to help court adjudicated youth reenter their school and community while keeping the family intact. The Academy is temporary intervention providing a "second chance" for students supervised by the juvenile court system.
♦Average length of enrollment: 9-12 months
♦Academic goals: increase reading and math skills, and credit recovery while completing the Day Treatment/Night Watch non-residential treatment program
♦Average enrollment: 30 students
♦Every student is evaluated through testing and examination of past school records. A comprehensive educational plan is designed to best meet each student's academic needs.

Star International Academy

Grades in 2007-2008: K-12, Spec, PK

School Opened: 1998 Current Contract Term: 2007 through 2012

Mission Statement:

The mission of Star International Academy is to provide students with a quality education that focuses on Michigan core curriculum and international cultures, including the study of a language, culture and history different from our own. The Academy shall provide an education of the whole child by integrating the different aspects of the children's learning and lives so as to make them more meaningful.
