Teacher - How can I change my teaching tactics?
Student – How can I change my learning tactics?
“Working collaboratively, educators will learn, implement, and reflect on the formative assessment process in order to guide student learning and teachers’ instructional practices.”
How do we accomplish?

- Learning team model of 6-8 classroom teachers led by a coach/facilitator
- Administrator engagement encouraged
How does FAME define the formative assessment process?

“Formative assessment is a process used by teachers and students during instruction that provides feedback to adjust ongoing teaching and learning to improve students’ achievement of intended instructional outcomes.”

Where are we now:

• FAME has become part of our regular duties and services to districts

• Assessment literacy improves in the county each year
Where are we now:

• Coaches are coming in more and more prepared
• Buildings are adding more and more teams every year
• Administrators are asking and debating about what building to add next and how to add more than one team per building
• High School wide initiative
FAME: Muskegon

Where are we now:

• Third and fourth year teams are now moving into new conversations about classroom assessment

• Continuing conversations with administrative academy on assessment literacy
FAME: Muskegon

*What Muskegon teachers say about ...*

- Impact on Student Learning
- Impact on Teacher Practice
- Being a part of Learning Team.
Student Learning

“When I use the formative assessment process, students have more ownership of their learning. It eliminates the passivity in the classroom when students have to reflect upon how and why they learn. Students must examine what they know and how they are learning. It also gives them opportunities to seek help.”
Student Learning

“Students no longer have to worry about the format of the assignment, they concentrate on mastering the material within.”
Student Learning

“Student learning has changed because students now have to think about their own learning, and how they are going to gain the knowledge of the objectives that are being presented.”
Student Learning

“Students must actively attack their own progression within a class, they no longer have the passive option.”
Teacher Practice

“The practice of teaching within the classroom has evolved greatly throughout the process. The largest mutations have occurred in planning and preparation of how to introduce and reinforce student friendly learning targets. I have found that the clearer the objective and the standard, the better and more precise student work has become....which has equaled an increase in grades, understanding and student success and confidence.”
Teacher Practice

“A large aspect of the formative assessment has been through self-assessing. Many of the assessments that are now built into my lessons show the students where they are having difficulty.”
Teacher Practice

“I have spent more time looking at the plans that I have for class, finding where formative assessment might be used in the class period, and how specifically I will use it.”
Being Part of a Learning Team

“At first, I thought the Learning Team was way too detailed and overly analytic. However, the whole focus of the team is to improve the craft of teaching. You focus more on getting students to learn rather than on getting students to simply perform a task. Being on a committee like this makes me examine what I really want in my classroom, both from my students and from myself.”
Being Part of a Learning Team

“The Learning Team allows you to hear and see others ideas, share your own, learn from each others success and mistakes. This allows growth to all involved in the process.”
Being Part of a Learning Team

“Good discussions of what and how teachers were using formative assessment in class has been the strongest reason for the learning team as well as having a knowledgeable leader to guide us in the discussion.”
Being Part of a Learning Team

“This process has me constantly questioning and contemplating the best way to assure student learning and comprehension. Learning is a Continuous Process.”
FAME: Muskegon

Where are we going:

• Continue to add new teams for 2014-2015
• Continue to look at the school-wide model (evaluating how it went this year)
• Contemplating new conversations around balanced assessment for veteran teams
• ???????
