

## Mich. Online Professional Learning System (MOPLS)

[www.learnport.org](http://www.learnport.org)

Michigan Learnport currently hosts 4 programs, which are part of the Michigan Online Professional Learning System (MOPLS). Just click on the link above, sign in, and click on Course Catalog. Then, search the program you want access:

- MOPLS ELA
- MOPLS Math
- MOPLS ASG
- ELPA

**MOPLS English Language Arts (ELA) and MOPLS Mathematics: Understanding Fractions** are online, professional learning modules developed by the MDE Bureau of Assessment and Accountability, Office of Special Education, and Office of Education Improvement and Innovation in collaboration with Michigan educators. The goal of these modules is to assist and support ELA and Mathematics instruction (specifically in grades K-8), with a strong connection to the Common Core State Standards for English Language Arts and Mathematics.

**MOPLS ASG Curriculum** is a companion to the Michigan Assessment Selection Guidance document. This curriculum can be used to train individuals and groups in matching student needs to Michigan's statewide assessments, using a dynamic flowchart tool and a decision-making worksheet to help teachers and assessment coordinators select the correct assessment for each of their students.

**Using and Interpreting ELPA Reports** includes Phase I: Understanding ELPA Reports, to help teachers, coordinators, and administrators understand the basics of using reports from the English Language Proficiency Assessment (ELPA), as well as Phase II: Using ELPA Reports, which can help teachers examine student results, identifying students' strengths and areas of need in order to design programs and instruction specifically tailored for their English language learners (ELLs).
