What Is Being Done?
Starting this spring, the Michigan Department of Transportation (MDOT) will reconstruct 5.6 miles of I-75 between Dixie Highway and I-275, along with bridge replacement and widening, culvert replacement and ramp reconstruction.

This two-year project is part of a multi-year plan to reconstruct I-75 in Monroe County.

How Will Traffic Be Affected?
Construction will be done in stages to minimize the impact on motorists and residents. During construction, two lanes of traffic will be open in each direction on I-75 through the use of median crossovers.

Ramp traffic will be maintained during construction. For local roads over I-75, there will be single-lane closures on Dixie Highway and Nadeau Road. Sandy Creek Road will be closed with traffic detoured.

Northbound I-75 will be reconstructed in 2015 and southbound I-75 will be reconstructed in 2016. Starting in December 2015, there will be a seasonal suspension of construction and three lanes will be open in each direction on I-75 over the winter. Construction is expected to resume in mid-March 2016.
