SUBJECT: Bureau of Highway Instructional Memorandum 2013-13
Materials Quality Assurance Procedures Manual

The Construction Field Services Division has made revisions to the Materials Quality Assurance Procedures Manual. The manual has been completely revised to clarify protocol, reflect the current state of practice, and reflect changes made for the 2012 Standard Specifications for Construction. The numbering convention for the sections has been updated to bring it into alignment with other MDOT manuals and guides. Several sections have been reorganized to present the material in a more orderly manner, making information easier to find. Section 4.12 has been added to present Buy America requirements.

Printed copies of the revised Materials Quality Assurance Procedures Manual will not be published. The updated manual will instead be available online at http://www.michigan.gov/mdot/0,4616,7-151-9622_11044_11367-207980--.00.html.
