

MPSCS 800 MHZ RADIO TRAINING – 2009

Please disseminate to Secondary Agencies

MSP Communications Section will be hosting 800 MHz Train the Trainer (TTT) courses throughout the Michigan area (schedule below). Operator training courses will be scheduled as requested, on a case by case basis. Classes are given at a low cost for any agency currently on the MPSCS system or any agency looking for training prior to a switch over from their current radio system. If your agency needs a Train the Trainer or Operator's Training besides the dates listed below, please contact Ms. Gloria Cline (contact information listed below.)

800 MHz Radio Training – Train the Trainer Course Description:

Train the Trainer is a four day in depth detailed 800 MHz course that gives trainers the tools needed to train a complex system to users. Personnel who complete the Train the Trainer course will have met the required MPSCS training to conduct the one day Operator Training course. Students are also provided with the necessary training aids to conduct MPSCS Operator Training classes including a PowerPoint presentation, quick reference guides, and operator training manuals for Motorola, EF Johnson and Kenwood radios.

800 MHz Radio Training – Operator Training Course Description:

The Operator Training course is an eight hour course, designed to teach users of the 800 MHz system to operate the portable and mobile radios. Personnel who complete the Operator Training course will have met the required MPSCS training and will be able to adequately operate the Motorola, EF Johnson or Kenwood radios that are used on the MPSCS. **This course does not prepare students to conduct radio training for their own agencies.**

Both courses are MCOLES Registered and eligible for 302 funds
