INSTRUCTIONS FOR THE FILING OF THE ANNUAL REPORT OF MAJOR AND NONMAJOR ELECTRIC UTILITIES

GENERAL INFORMATION

Purpose:

By authority conferred upon the Michigan Public Service Commission by 1909 PA 106, as amended, being MCL 460.556 et seq. and 1969 PA 306, as amended, being MCL 24.201 et seq., this form is a regulatory support requirement. It is designed to collect financial and operational information from public utilities, licensees and others subject to the jurisdiction of the Michigan Public Service Commission. This report is a nonconfidential public use form.

II. Who Must Submit:

Each major and nonmajor public utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees must submit this form.

NOTE: Major utilities means utilities that had, in each of the last three consecutive years, sales or transmission service that exceeded any one or more of the following:

- (a) one million megawatt-hours of total sales;
- (b) 100 megawatt-hours of sales for resale;
- (c) 500 megawatt-hours of gross interchange out; or
- (d) 500 megawatt-hours of wheeling for others (deliveries plus losses)

III. What and Where to Submit:

(a) Submit an original copy of this form to:

Michigan Public Service Commission (Regulated Energy Division)
Financial Analysis and Customer Choice Section
6545 Mercantile Way
P.O. Box 30221
Lansing, MI 48909

Retain one copy of this report for your files. <u>Also</u> submit the electronic version of <u>this</u> record to Bill Stosik at the address below or to bmstosi@michigan.gov

Submit immediately upon publication, one (1) copy of the latest annual report to stockholders and any annual financial or statistical report regularly prepared and distributed to bondholders, security analyst, or industry association. Do not include monthly and quarterly reports. If reports to stockholders are not prepared, enter "NA" in column (c) on Page 4, the List of Schedules.) Mail these reports to:

Michigan Public Service Commission (Regulated Energy Division)
Financial Analysis and Customer Choice Section
6545 Mercantile Way
P.O. Box 30221
Lansing, MI 48909

- (c) For the CPA certification, submit with the original submission, or within 30 days after the filing date for this form, a letter or report:
 - (i) Attesting to the conformity, in all material aspects, of the below listed (schedules and) pages with the Commission's applicable Uniform Systems of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and
 - (ii) Signed by independent certified public accountants or an independent licensed public accountant, certified or licensed by a regulatory authority or a state or other political subdivision of the U.S. (See 18 CFR 41.10-41.12 for specific qualifications).

Schedules	Reference Page
Comparative Balance Sheet	110 - 113
Statement of Income	114 - 117
Statement of Retained Earnings	118 - 119
Statement of Cash Flows	120 - 121
Notes to Financial Statements	122 - 123

When accompanying this form, insert the letter or report immediately following the cover sheet. Use the following form for the letter or report unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under the date of ____ we have also reviewed schedules ____ of Form P-521 for the year filed with the Michigan Public Service Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Michigan Public Service Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

State in the letter or report which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(d) Federal, state, and local governments and other authorized user may obtain additional blank copies to meet their requirements for a charge from:

Michigan Public Service Commission (Regulated Energy Division) Financial Analysis and Customer Choice Section 6545 Mercantile Way P.O. Box 30221 Lansing, MI 48909

IV. When to Submit

Submit this report form on or before April 30 of the year following the year covered by this report.

GENERAL INSTRUCTIONS

- Prepare this report in conformity with the Uniform System of Accounts (USOA). Interpret all accounting words and phrases in accordance with the USOA.
- Enter in whole number (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required). The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances

- at the end of the current reporting year, and use for statement of income accounts the current year's accounts.
- III. Complete each question fully and accurately, even if it has been answered in a previous annual report.

 Enter the word "NONE" where it truly and completely states the fact.
- IV. For any page(s) that is not applicable to respondent, either
 - (a) Enter the words "NOT APPLICABLE" on the particular page(s), OR
 - (b) Omit the page(s) and enter "NA", "NONE", or "NOT APPLICABLE" in column (c) on the List of Schedules, pages 2, 3, 4 and 5.
- V. Complete this report by means which result in a permanent record. Complete the original copy in permanent black ink or typewriter print, if practical. Additional copies must be clear and readable.
- VI. Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" included in the header of each page is to be completed only for resubmissions (See VIII. below). The date of the resubmission must be reported in the header for all form pages, whether or not they are changed from the previous filing.
- VII. Indicate negative amounts (such as decreases) by enclosing the figures in parentheses ().
- When making revisions, resubmit only those pages that have been changed from the original submission. Submit the same number of copies as required for filing the form. Include with the resubmission the identification and Attestation page, page 1. Mail dated resubmissions to:

Michigan Public Service Commission (Regulated Energy Division)
Financial Analysis and Customer Choice Section
6545 Mercantile Way
P.O. Box 30221
Lansing, MI 48909

- Provide a supplemental statement further explaining accounts or pages as necessary. Attach the supplemental statement (8 1/2 x 11 inch size) to the page being supplemented. Provide the appropriate identification information, including the title(s) of the page and page number supplemented.
- X. Do not make references to reports of previous years or to other reports in lieu of required entries, except as specifically authorized.
- Wherever (schedule) pages refer to figures from a previous year, the figures reported must be based upon those shown by the annual report of the previous year, or an appropriate explanation given as to why the different figures were used.
- Respondents may submit computer printed schedules (reduced to 8 1/2 x 11 inch size) instead of the preprinted schedules if they are in substantially the same format.
- XIII. A copy of the FERC Annual Report Form is acceptable to substitute for the same schedules of this report.

DEFINITIONS

- L. Commission Authorization (Comm. Auth.) The authorization of the Michigan Public Service Commission, or any other Commission. Name the Commission whose authorization was obtained and give the date of the authorization.
- II. Respondent The person, corporation, licensee, agency, authority, or other legal entity or instrumentality in whose behalf the report is made.

Note 1:		1	ı	
The Company is required by the Securitie	s and Exchange Commission to repor	t attendance of any direc	tor that has atte	ended less

The Company is required by the Securities and Exchange Commission to report attendance of any director that has attended less than 75 percent of Board and Committee meetings. No director attended fewer than 84% of the total number of meetings of the Board and Board committees on which he or she served.

Note 2:

The Company is required by the Securities and Exchange Commission to report information regarding the compensation of directors. During 2006, each non-employee director received an annual retainer fee of \$36,000. Non-employee chairs of Board Committees received a quarterly retainer of \$1,250. Non-employee directors received a fee of \$1,500 for each Board or committee meeting attended. In addition, each non-employee director received a per diem fee of \$1,250 for travel on Company business for each day on which a Board or committee meeting was not also held, and the Company reimbursed non-employee directors for all out-of-pocket travel expenses. Non-employee directors were paid \$300 for each signed, written unanimous consent in lieu of a meeting. The lead nuclear director received a quarterly retainer of \$1,250, and attendance fee of \$1,500 for each business meeting/site visit and a per diem fee of \$1,250 for travel on Company business for each day on which a business meeting/site visit was not also held. Each non-employee director also received on January 2, 2006, the 2006 annual stock compensation award in the form of restricted stock equal to a value of \$65,000, with vesting to occur three years from the grant date. Employee directors do not receive any directors' fees.

SECURITY HOLDERS AND VOTING POWERS

1.(A)Give the names and addresses of the 10 security holder: of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders on the respondent, prior to the end of the year, had the highest voting powers in the respondent, and state the number of votes which each would have had the right to cast on that date if a meeting were then in order. If any sucl holder held in trust, give in a footnote the known particulars of the trust (whether voting trust, etc.) duration of trust, and principal holders of beneficiar: interests in the trust. If the stock book was not closed or a list of stockholders was not compiled within one year prior to the end of the year, or if since the previous compilation of a list of stockholders, some other class o: security has become vested with voting rights, then show such 10 security holders as of the close of the year Arrange the names of the security holders in the orde: of voting power, commencing with the highest. Show in column (a) the titles of officers and directors included in such list of 10 security holders.

(B) Give also the name and indicate the voting power; resulting from ownership of securities of the respondents of each officer and director not included in the list of 1 largest security holders.

- 2. If any security other than stock carries voting rights, explain in a footnote statement the cicumstances whereby such security became vested with voting rights and give other important particulars (details) concerning the voting rights of such security.
- State whether voting rights are actual or contingent; if contingent, describe the contingency
- 3. If any class or issue of security has any special privileges in the election of directors, trustees or managers, or in the determination of corporate action by any method, explain briefly in a footnote.
- 4. Furnish particulars (details) concerning any options, warrants, or rights outstanding at the end of the year for others to purchase securities of the respondent or any securities or other assets owned by the respondent, including prices, expiration dates, and other material information relating to exercise of the options, warrants, or rights. Specify the amount of such securities or assets sentitled to be purchased by any officer, director associated company, or any of the ten largest security holders. This instruction is inapplicable to convertible securities or to any securities substantially all of which are outstanding in the hands of the general public where the options warrants, or rights were issued on a prorata basis.

- 1. Give date of the latest closing of the stock book prior to end of year, and state the purpose of such closing: Books were not closed but listings were prepared as of December 31, 2006 for the purpose of updating records and preparing statistical data.
- 2. State the total number of votes cast at the latest general meeting prior to the end of year for election of directors of the respondent and number of such votes cast by proxy
 Total: 33,289,327

33,289,327

By proxy:

such meeting:
April 28, 2006

3. Give the date and place of

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)						

- 1. No new changes in franchise right::.
- 2. None
- 3. The transactions below represent 4th Quarter activity only, transactions in earlier quarters were previously reported.

On August 25, 2006, Wisconsin Electric Power Company ("WE") received authorization from the Public Service Commission of Wisconsin ("PSCW") to sell and transfer certain electric distribution to the City of Hartford (File 05-BS-156). The customer transfer was completed on October 14, 2006. Journal entries to record the sale and clear account 102 were submitted on October 31, 2006. Approval was received on November 1, 2006. The facilities had a net book value of \$17,957 and a sales price of \$26,146.

On October 18, 2006, WE received PSCW authorization to sell and transfer certain electric distribution to the City of Slinger (File 05-BS-159). The customer transfer was completed on October 26, 2006. Journal entries to record the sale and clear account 102 were submitted on October 31,2006. Approval was received on November 1, 2006. The facilities had a net book value of \$21,461 and a sales price of \$27,612.

- 4. No new leases acquired, assigned or surrendered during the fourth quarter of 2006 or during the year of 2006.
- 5. None
- 6. In November 2006, WE issued \$300,000,000 principal amount of 5.70% debentures due December 1, 2036. PSCW authorization for the issuance of these securities was issued on July 4, 2004 under Docket No. 6630-SB-123.

At December 31, 2006, WE had \$274,300,000 of commercial paper outstanding. PSCW authorization was issued on January 10, 2006 in Docket No. 6630-SB-120.

- 7. There have been no changes to the WE Articles of Incorporation (As Amended and Restated January 10, 1995) or Bylaws (As amended to May 1, 2000, Inclusive).
- 8. There was a 3.00 to 3.35% wage increase for union employees, depending on the applicable bargaining unit, effective at various dates in 2006. There was a 3.25% average wage increase for management employees effective 1/1/2006.
- 9. Department of Energy Case: On November 16, 2000, WE filed a complaint against the U.S. Department of Energy ("DOE") in the U.S. Court of Federal Claims, claiming that the DOE had breached its Standard Contract with WE to begin removing used nuclear fuel from Point Beach Nuclear Plant by January 31, 1998 as mandated by the Nuclear Waste Policy Act of 1982, as amended in 1987 (the "Waste Act"). The matter is pending. WE has incurred substantial damages to date and damages continue to accrue. WE is seeking recovery of its damages in this lawsuit.
- 10. No transactions to report.
- 11. Reserved
- 12. Nothing to report.

WISCONSIN ELECTRIC POWER COMPANY

2006 FINANCIAL STATEMENT NOTES, MODIFIED FOR REQUIREMENTS OF THE FERC

SUPPLEMENTAL NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - REGULATORY REPORTING IN THIS REPORT COMPARED TO GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

The accounting records of Wisconsin Electric are maintained as prescribed by FERC modified for the requirements of the PSCW. The accompanying financial statements have been prepared in accordance with the accounting requirements of these regulators, which differs from GAAP. Wisconsin Electric classifies certain items in its accompanying Comparative Balance Sheet (primarily the components of accumulated depreciation, accumulated deferred income taxes, certain miscellaneous current and accrued liabilities and maturities of long-term debt) in a manner different than that required by GAAP.

Cash and Cash Equivalents Supplementary Information: We made the following payments associated with our cash flow statements for the years ended December 31:

	_2006	_2005_
	(Millions o	f Dollars)
Cash Paid For		
Interest (net of amount capitalized)	\$84.9	\$78.4
Income taxes (net of refunds)	\$172.7	\$114.1

Investments in Majority-Owned Subsidiaries: In accordance with regulatory reporting requirements, Wisconsin Electric accounts for its investments in majority-owned subsidiaries under the equity method rather than consolidating the assets, liabilities, revenues and expenses of these subsidiaries as required by GAAP. As such, Wisconsin Electric accounts for its wholly-owned subsidiary, Bostco as an investment in account 123.1 for regulatory reporting purposes.

AFUDC: Adjustments for the period of 1988 through 2006 have been made to Utility Plant in Service to reflect the difference in AFUDC computed using the method prescribed by the PSCW and AFUDC computed under the formula required by FERC. The difference was recorded as a carrying charge in Other Regulatory Assets. Concurrent adjustments have been made to Accumulated Depreciation to reflect the amortization of the carrying charge for the period of 1988 through 2006 based upon the depreciation rate for total electric plant.

Adjustments have been made in this report to AFUDC-Equity, Miscellaneous Nonoperating Income and AFUDC-Debt to reflect the difference in AFUDC computed using the PSCW method and the FERC formula.

We recorded the following AFUDC for FERC reporting purposes during the years ended December 31:

	<u>2006</u>	<u>2005</u>
	(Millions of	f Dollars)
AFUDC-Debt	\$10.7	\$8.0
AFUDC-Equity	\$4.2	\$4.6

For additional information concerning AFUDC, including AFUDC recorded for GAAP reporting purposes, see Note A in the Notes to Consolidated Financial Statements that follow.

Name of Respondent	This Report is: (1) X An Original (2) A Resubmission	Date of Report (Mo, Da, Yr)	Year/Period of Report
Wisconsin Electric Power Company NOTES TO	D FINANCIAL STATEMENTS (Continue		

The following table illustrates capital expenditures by segment reflecting AFUDC adjustments for FERC reporting purposes during the years ended December 31, 2006 and 2005.

Year Ended	Reportable Op Electric	Gas	nents Steam ons of Doll	Other ars)	Total
December 31, 2006	\$362.4	\$33.6	\$2.6	\$ -	\$398.6
December 31, 2005	\$374.7	\$28.4	\$4.6	\$2.0	\$409.7

For capital expenditures by segment for GAAP reporting purposes, see Note O in the Notes to Consolidated Financial Statements that follow.

Accounting for MISO Energy Transactions: Under FERC guidance issued in April 2006, energy transactions in an RTO should be netted and measured on an hourly basis. FERC also determined that the day-ahead and real-time markets should be considered separately for purposes of netting energy transactions. We follow this FERC guidance in consideration of our FERC reporting requirements. For GAAP reporting purposes, we combine the day-ahead and real-time markets and we record energy transactions on a net basis for each hour.

For regulatory purposes, since we are a net seller, we credit the net sales to account 447 (which is included in account 400) instead of account 555. The following table reconciles Wisconsin Electric's operating revenues and purchased power expenses as reported for GAAP purposes compared to those reported for regulatory purposes:

	Operating R (a/c 400; p. 11 2006		Purchased (a/c 555; p. 32) 2006	
GAAP*	\$3,116.7	N/A	\$301.7	N/A
Regulatory Reporting Adjustments: Netted Energy Transactions FERC Form 1	27.2 \$3,143.9	N/A N/A	27.2 \$328.9	N/A N/A

^{*} For GAAP Operating Revenues, see Income Statement in Item 8 of 10-K.

For GAAP Purchased Power, see Management's Discussion and Analysis of Financial Condition and Results of Operations - Results of Operations - Electric Utility Gross Margin in Item 7 of 10-K

Regulatory Assets and Liabilities: The following table reconciles Wisconsin Electric's regulatory assets and liabilities as reported for GAAP purposes to regulatory assets and liabilities reported for regulatory purposes:

parposee it 17g	Regulatory (a/c 182; p. 111 2006		Regulatory 1 (a/c 254; p. 11 2006) f Dollars)	
GAAP (See Note C)	\$859.5	\$822.5	\$1,142.3	\$1,051.9
Regulatory Reporting Adjustments: AROs Non-ARO Cost of Removal Other	364.4	347.0 - 9.7 \$1.179.2	364.4 (430.5) 0.2 \$1,076.4	347.0 (414.1) 2.9 \$987.7
FERC Form 1 FORM NO. 1 (ED. 12-88)	\$1,234.6 Page 123.5		<u> </u>	

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) X An Original	(Mo, Da, Yr)	•		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

Wisconsin Electric collects future removal costs in rates for many assets that do not have an associated legal asset retirement obligation as defined by Statement of SFAS 143. The liability for the estimated future removal costs collected in rates is recognized for regulatory accounting purposes in account 108 as part of accumulated depreciation. This classification differs from how Wisconsin Electric reports such amounts for GAAP reporting purposes. For GAAP reporting purposes, this liability of \$430.5 million and \$414.1 million as of December 31, 2006 and 2005, respectively, was classified as a regulatory liability on the 2005 10-K balance sheets of Wisconsin Electric. For further information, see property and depreciation in Note A of the Notes to Consolidated Financial Statements that follow.

For GAAP reporting purposes, Wisconsin Electric reports ARO-related regulatory liabilities net of ARO-related regulatory assets. During 2004, Wisconsin Electric began recording ARO-related regulatory assets on a gross basis in account 182 for regulatory reporting purposes. These ARO-related assets were \$364.4 million and \$347.0 million as of December 31, 2006 and 2005, respectively.

Other Comprehensive Income: In September 2006, the FASB issued SFAS 158, and Wisconsin Energy adopted SFAS 158 prospectively on December 31, 2006. SFAS 158 requires an adjustment to accumulated other comprehensive income (AOCI) upon adoption for GAAP reporting. However, FERC reporting forms require that all changes in AOCI be reflected in current year other comprehensive income.

NOTE 2 - LOSS ON REACQUIRED BONDS

In June and August 2003, Wisconsin Electric optionally repurchased a total of \$485.0 million of first mortgage bonds. Wisconsin Electric deferred associated net debt extinguishment costs in account 189 under the PSCW-authorized revenue neutral method of accounting pursuant to Docket 6630-SB-121. These deferred costs were amortized over an approximately two-year period ending in 2005. No deferred early debt redemption costs were outstanding in account 189 as of December 31, 2006 and 2005. Amortization of these costs for the years ended December 31, 2006 and 2005 was zero and approximately \$6.2 million, respectively.

NOTE 3 - RESTRICTIONS ON RETAINED EARNINGS

As of December 31, 2006, Wisconsin Electric has appropriated retained earnings in account 215.1 in the amount of \$4.8 million as required by the FERC for licensed hydro project amortization reserve purposes.

NOTE 4 - SPECIAL ASSESSMENTS UNDER ENERGY POLICY ACT OF 1992

The Energy Policy Act of 1992 established a Uranium Enrichment Decontamination and Decommissioning Fund (D&D Fund) for the United States Department of Energy's nuclear enrichment facilities. Deposits to the D&D Fund are derived in part from special assessments on utilities using enrichment services. In October 2006, a final payment was made to the DOE. As a result, a liability no longer exists for this fund. The deferred regulatory asset will be amortized to nuclear fuel expense and included in utility rates through September 2007.

The following information on special D&D Fund assessments levied under the Energy Policy Act of 1992 is provided in accordance with FERC Docket No. RM93-18-001:

	2006 (Millions of	2005 f Dollars)
Expenses recorded in Account 518 Payments to Department of Energy	\$3.7 \$3.9	\$3.6 \$3.7

NOTES TO FINANCIAL STATEMENTS (Continued)			

WISCONSIN ELECTRIC POWER COMPANY

2006 FINANCIAL STATEMENT NOTES, MODIFIED FOR REQUIREMENTS OF FERC

10-K NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A -- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General: Wisconsin Electric Power Company (Wisconsin Electric, the Company, our, us or we), a wholly-owned subsidiary of Wisconsin Energy, is an electric, gas and steam utility which services electric customers in Wisconsin and the Upper Peninsula of Michigan, gas customers in Wisconsin and steam customers in metro Milwaukee, Wisconsin. We consolidate our wholly owned subsidiary Bostco. Bostco owns real estate properties that are eligible for historical rehabilitation tax credits. Bostco had total assets of \$39.5 million as of December 31, 2006.

All significant intercompany transactions and balances have been eliminated from the consolidated financial statements.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications: We have reclassified certain prior year financial statement amounts to conform to their current year presentation. These reclassifications had no effect on total assets or net income.

Revenues: We recognize energy revenues on the accrual basis and include estimated amounts for services rendered but not billed.

Our retail electric rates in Wisconsin are established by the PSCW and include base amounts for fuel and purchase power costs. The electric fuel rules in Wisconsin allow us to request rate increases if fuel and purchased power costs exceed bands established by the PSCW. In a rate order issued in January 2006, the PSCW approved a plan to refund any over-collected fuel on an annual basis for 2006. For 2007, the band is plus or minus 2%.

Our retail gas rates include monthly adjustments which permit the recovery or refund of actual purchased gas costs. We defer any difference between actual gas costs incurred (adjusted for a sharing mechanism) and costs recovered through rates as a current asset or liability. The deferred balance is returned to or recovered from customers at intervals throughout the year.

Accounting for MISO Energy Transactions: MISO implemented the MISO Midwest Market on April 1, 2005. The MISO Midwest Market operates under both day-ahead and real-time markets. We record energy transactions in the MISO on a net basis for each hour.

Other Income, net: We recorded the following items in Other Income, net for the years ended December 31:

Other Income, net		_2005_
	(Millions of	Dollars)
Capitalized Carrying Costs	\$25.0	\$20.4
AFUDC – Equity	14.5	9.2
Donations and Contributions	(6.0)	(6.7)
Gross Receipts Tax Recovery	4.0	2.6
Other, net	5.4	2.9_
Total Other Income, net	\$42.9	\$28.4

Name of Respondent	This Report is: (1) X An Original	Date of Report (Mo, Da, Yr)	Year/Period of Report
Wisconsin Electric Power Company	(2) A Resubmission	03/31/2007	2006/Q4
Wisconsin Electric Fower Company NOTES TO F	FINANCIAL STATEMENTS (Continued	1)	

Property and Depreciation: We record property, plant and equipment at cost. Cost includes material, labor, overheads and capitalized interest. Utility property also includes AFUDC - Equity. Additions to and significant replacements of property are charged to property, plant and equipment at cost; minor items are charged to maintenance expense. The cost of depreciable utility property less salvage value is charged to accumulated depreciation when property is retired.

We include capitalized software costs associated with our regulated operations under the caption "Property, Plant and Equipment" on the Consolidated Balance Sheets. As of December 31, 2006 and 2005, the net book value of our capitalized software totaled \$17.7 million and \$21.8 million, respectively. The estimated useful life of our capitalized software is five years.

Our utility depreciation rates are certified by the state regulatory commissions and include estimates for salvage value and removal costs. Depreciation as a percent of average depreciable utility plant was 3.7% in 2006 and 3.9% in 2005. Nuclear plant decommissioning costs are accrued and included in depreciation expense (see Note F). The decline in depreciation as a percent of average depreciable utility plant was due to new depreciation rates approved by the PSCW, which became effective January 1, 2006.

For assets other than our regulated assets and leased equipment, we accrue depreciation expense at straight-line rates over the estimated useful lives of the assets, or over the non-cancellable lease term for leased equipment.

We collect in our rates amounts representing future removal costs for many assets that do not have an associated asset retirement obligation (ARO). We record a regulatory liability on our balance sheet for the estimated amounts we have collected in rates for future removal costs less amounts we have spent in removal activities. This regulatory liability was \$430.5 million as of December 31, 2006 and \$414.1 million as of December 31, 2005.

Allowance For Funds Used During Construction: AFUDC is included in utility plant accounts and represents the cost of borrowed funds (AFUDC - Debt) used during plant construction and a return on stockholders' capital (AFUDC - Equity) used for construction purposes. AFUDC - Debt is recorded as a reduction of interest expense and AFUDC - Equity is recorded in Other Income, net.

During 2006, we accrued AFUDC at a rate of 8.94%, as authorized by the PSCW. During 2005, the authorized rate was 10.18%. We accrue AFUDC on all electric utility NO_X, SO₂ and particulates remediation projects. Our rates were set to provide a full return on electric safety and reliability projects so AFUDC is not accrued on these projects. We accrued AFUDC on 50% of the remaining electric, gas and steam projects in CWIP and rates were set assuming that 50% of the CWIP balances were included in rate base.

We recorded the following AFUDC for the years ended December 31:

	2006	<u>2005</u>
	(Millions of	Dollars)
AFUDC – Debt	\$5.1	\$4.6
AFUDC – Equity	\$14.5	\$9.2

Materials, Supplies and Inventories: Our inventory at December 31 consists of:

Materials, Supplies and Inventories	2006 (Millions o	2005 of Dollars)
Fossil Fuel Materials and Supplies Natural Gas in Storage Total	\$119.7 100.6 92.7 \$313.0	\$90.4 89.3 117.8 \$297.5

Substantially all fossil fuel, materials and supplies and natural gas in storage inventories are recorded using the weighted-average

Name of Respondent	This Report is:	Date of Report	Year/Period of Report

Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4
NOTES TO FINANCIAL STATEMENTS (Continued)			

method of accounting.

Regulatory Accounting: We account for our regulated operations in accordance with SFAS 71. This statement sets forth the application of GAAP to those companies whose rates are determined by an independent third-party regulator. The economic effects of regulation can result in regulated companies recording costs that have been or are expected to be allowed in the rate making process in a period different from the period in which the costs would be charged to expense by an unregulated enterprise. When this occurs, costs are deferred as assets in the balance sheet (regulatory assets) and recorded as expenses in the periods when those same amounts are reflected in rates. We defer all of our regulatory assets pursuant to specific orders or by a generic order issued by our primary regulator. Additionally, regulators can impose liabilities upon a regulated company for amounts previously collected from customers and for amounts that are expected to be refunded to customers (regulatory liabilities). We expect to recover our outstanding regulatory assets in rates over a period of no longer than 20 years. For further information, see Note C.

Derivative Financial Instruments: We have derivative physical and financial instruments as defined by SFAS 133 which we report at fair value. However, our use of financial instruments is limited. For further information, see Note J.

Cash and Cash Equivalents: Cash and cash equivalents include marketable debt securities acquired three months or less from maturity.

We have nuclear decommissioning trusts that hold investments in debt and equity securities. All assets within the nuclear decommissioning trusts are restricted to nuclear decommissioning activities as set forth by regulations promulgated by the IRS and by the PSCW. The accompanying Consolidated Statements of Cash Flows include proceeds from investments within the nuclear decommissioning trusts and purchases of investments within the nuclear decommissioning trusts.

Margin Accounts: Cash deposited in brokerage accounts for margin requirements is recorded in Other Current Assets on our Consolidated Balance Sheets.

Restrictions: Various financing arrangements and regulatory requirements impose certain restrictions on our ability to transfer funds to Wisconsin Energy in the form of cash dividends, loans or advances. In addition, under Wisconsin law, we are prohibited from loaning funds, either directly or indirectly, to Wisconsin Energy. We do not believe that these restrictions will materially affect our operations. For further information, see Note N.

Asset Retirement Obligations: We adopted SFAS 143 effective January 1, 2003. We adopted FIN 47 effective December 31, 2005. FIN 47 defines the term conditional ARO as used in SFAS 143. As defined in FIN 47, a conditional ARO refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. Consistent with SFAS 143, we record a liability at fair value for a legal ARO in the period in which it is incurred. When a new legal obligation is recorded, we capitalize the costs of the liability by increasing the carrying amount of the related long-lived asset. We accrete the liability to its present value each period and depreciate the capitalized cost over the useful life of the related asset. At the end of the asset's useful life, we settle the obligation for its recorded amount or incur a gain or loss. As it relates to our regulated operations, we apply SFAS 71 and recognize regulatory assets or liabilities for the timing differences between when we recover legal AROs in rates and when we would recognize these costs under SFAS 143. For further information, see Note I.

Investments: We account for investments in other affiliated companies in which we do not maintain control using the equity method. As of December 31, 2006 and 2005, we had a total ownership interest of approximately 25.8% and 29.4%, in ATC. We are represented by one out of ten ATC board members, each of whom has one vote. Due to the voting requirements, no individual member has more than 10% of the voting control. For further information regarding such investments, see Note P.

Nuclear Fuel Amortization: We lease our nuclear fuel and amortize the fuel inventory to fuel expense as the power is generated, generally over a period of 60 months.

Income Taxes: We follow the liability method in accounting for income taxes as prescribed by SFAS 109. SFAS 109 requires the recording of deferred assets and liabilities to recognize the expected future tax consequences of events that have been reflected in our financial statements or tax returns and the adjustment of deferred tax balances to reflect tax rate changes. We are required to assess the

Name of Respondent	This Report is: (1) X An Original	Date of Report (Mo, Da, Yr)	Year/Period of Report
Wisconsin Electric Power Company	(2) A Resubmission	03/31/2007	2006/Q4
	NOTES TO FINANCIAL STATEMENTS (Continued	i)	

likelihood that our deferred tax assets would expire before being realized.

Tax credits associated with regulated operations are deferred and amortized over the life of the assets. We are included in Wisconsin Energy's consolidated Federal income tax return. Wisconsin Energy allocates Federal tax expense or credits to us based on our separate tax computation.

Investment tax credits related to regulated utility assets are recorded as a deferred credit on the balance sheet and amortized to income over the applicable service lives of related properties in accordance with regulatory treatment. Historical rehabilitation credits are reported in income in the year claimed.

Wisconsin Energy allocates the tax benefit of stock options exercised to us to the extent the option holder's payroll cost was incurred by us. We record the allocated tax benefit as an addition to paid in capital.

We recognize interest and penalties accrued related to unrecognized tax benefits in Income Taxes in our Consolidated Income Statements, as well as Regulatory Assets or Regulatory Liabilities in our Consolidated Balance Sheets.

We collect sales and use taxes from our customers and remit these taxes to governmental authorities. These taxes are recorded in our Consolidated Income Statements on a net basis.

Stock Options: Employees of Wisconsin Electric participate in the Wisconsin Energy stock-based compensation plan. The amounts reported represent the allocated costs related to options held by our employees. For more information on the plan, see Note N.

Effective January 1, 2006, Wisconsin Energy adopted SFAS 123R, using the modified prospective method. Wisconsin Energy uses a binomial pricing model to estimate the fair value of stock options granted subsequent to December 31, 2005. Prior to January 1, 2006, Wisconsin Energy accounted for share based compensation under APB 25, Accounting for Stock Issued to Employees, and we disclosed the pro forma impact of share based compensation expense under SFAS 123. Historically, all stock options have been granted with an exercise price equal to the fair market value of the common stock on the date of grant and expire no later than ten years from the grant date. Accordingly, no compensation expense was recognized in connection with option grants. All options granted subsequent to December 31, 2004 vest on a cliff-basis after a three year period. Prior to January 1, 2006, we reported benefits of tax deductions in excess of recognized compensation costs as operating cash flows. SFAS 123R requires that excess tax benefits be reported as a financing cash inflow rather than as an operating cash inflow. For further discussion of this new standard and the impacts to our Consolidated Financial Statements, see Note N.

Wisconsin Energy previously adopted the disclosure provisions of SFAS 123 as amended by SFAS 148. The fair value of each Wisconsin Energy option at date of grant for 2006 was calculated using a binomial option pricing model. For 2005, the fair value of options at the date of grant was estimated using the Black-Scholes option-pricing model with the following weighted average assumptions:

	Binomial	Black-Scholes
	2006	2005
Risk free interest rate	4.3% - 4.4%	4.4%
Dividend yield	2.4%	2.5%
Expected volatility	17.0% - 20.0%	19.0%
Expected life (years)	6.3	10.0
Pro forma weighted average fair value of our stock options granted	\$7.55	\$8.32

compensation expense included in reported net income, net of related tax effects Deduct: Total stock-based employee compensation expense determined under fair value based method for all	1.7
awards, net of related tax effects Net Income - Pro forma	3.0 \$282.3

B-RECENT ACCOUNTING PRONOUNCEMENTS

Share Based Compensation: In December 2004, the FASB issued SFAS 123R, which amended SFAS 123. In March 2005, the SEC issued SAB 107 regarding the SEC's interpretation of SFAS 123R and the valuation of share-based payment for public companies. This statement requires that the compensation costs relating to such transactions be recognized in the consolidated income statement. Wisconsin Energy adopted SFAS 123R and SAB 107 effective January 1, 2006 using the modified prospective method. For additional information, see Note N.

Implicit Variable Interests: In April 2006, the FASB issued FSP FIN 46R-6. FSP FIN 46R-6 addresses the requirement to determine the variability to be considered in applying FIN 46R-6 based on an analysis of the design of the entity. As required, we adopted FSP FIN 46R-6 effective July 1, 2006 for any new arrangements entered into after the effective date. For further information, see Note D.

Uncertainty in Income Taxes: In July 2006, the FASB issued FIN 48, an interpretation of SFAS 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the enterprise's financial statements in accordance with SFAS 109. We adopted FIN 48 effective January 1, 2007. For further information, see Note E.

Fair Value Measurements: In September 2006, the FASB issued SFAS 157. SFAS 157 provides guidance for using fair value to measure assets and liabilities. SFAS 157 defines fair value, provides a framework for measuring fair value and expands disclosures related to fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. We are currently evaluating the provisions of SFAS 157 and we expect to adopt SFAS 157 on January 1, 2008.

Pension and Other Post-retirement Plans: In September 2006, the FASB issued SFAS 158, an amendment of SFAS 87, 88, 106 and 132R. SFAS 158 requires recognition of the overfunded or underfunded status of a defined benefit post-retirement plan as an asset or liability on the balance sheet and recognition of changes in that funded status in the year in which the changes occur through comprehensive income. SFAS 158 also requires an employer to measure the funded status of a plan as of the date of its year end balance sheet. We adopted SFAS 158 as of December 31, 2006. For further information, see Note L.

Financial Statement Errors: In September 2006, the SEC staff issued SAB 108. SAB 108 addresses the diversity in practice by registrants when quantifying the effect of an error on the financial statements. SAB 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements. We adopted the provisions of SAB 108 effective December 31, 2006. The adoption of SAB 108 did not have any financial impact on our consolidated financial statements.

N SOOTON Electrical N	OTES TO FINANCIAL STATEMENTS (Continued	1)	

C -- REGULATORY ASSETS AND LIABILITIES

We account for our regulated operations in accordance with SFAS 71.

Our primary regulator considers our regulatory assets and liabilities in two categories, escrowed and deferred. In escrow accounting we expense amounts that are included in rates. If actual costs exceed, or are less than the amounts that are allowed in rates, the difference in cost is escrowed on the balance sheet as a regulatory asset or regulatory liability and the escrowed balance is considered in setting future rates. Under deferred cost accounting, we defer amounts to our balance sheet based upon specific orders or correspondence with our primary regulator. These deferred costs will be considered in future rate setting proceedings. As of December 31, 2006, we had approximately \$30.0 million of net regulatory assets that were not earning a return.

Our regulatory assets and liabilities as of December 31 consist of:

	(Millions of	
Regulatory Assets Deferred unrecognized pension costs (see Note L) Escrowed electric transmission costs Deferred income tax related Deferred plant related capital leases (see Note G) Deferred fuel related costs Deferred environmental costs Escrowed unrecovered plant costs Other, net Total long-term regulatory assets Regulatory Liabilities	\$236.3 192.2 95.2 88.9 79.1 42.4 31.6 93.8 \$859.5	\$240.7 169.4 93.5 72.4 72.8 43.9 56.5 73.3 \$822.5
Deferred asset retirement obligations (see Notes F and I) Deferred cost of removal obligations (see Notes F and I) Deferred income tax related Other, net Total long-term regulatory liabilities Net long-term regulatory liabilities	\$537.1 430.5 85.6 89.1 \$1,142.3 \$282.8	\$475.3 414.1 91.6 70.9 \$1,051.9 \$229.4

As of December 31, 2005, we recorded a minimum pension liability to reflect the funded status of our pension plans (see Note L). Under SFAS 158, which Wisconsin Energy adopted effective December 31, 2006, we have concluded that substantially all of the unrecognized costs resulting from the recognition of the funded status of the pension and OPEB plans qualify as a regulatory asset.

We record deferred regulatory assets and liabilities representing the future expected impact of deferred taxes on utility revenues (see Note A).

In October 2002, the PSCW issued an order authorizing us to implement a surcharge for recovery of annual electric transmission costs projected through 2005. In addition, the PSCW order authorized escrow accounting treatment for transmission costs.

As of December 31, 2006, we have deferred \$79.1 million of fuel related costs. The majority of these deferred costs were incurred in 2005 as a result of an extended outage at Point Beach, increased costs associated with reduced coal deliveries due to a railroad transportation problem and increased costs associated with the MISO Midwest Market.

Consistent with a generic order from and past rate-making practices of the PSCW, we defer as a regulatory asset costs associated with the remediation of former manufactured gas plant sites. As of December 31, 2006, we have recorded \$42.4 million of environmental costs associated with manufactured gas plant sites as a regulatory asset, including \$26.9 million of deferrals for actual remediation costs incurred and a \$15.5 million accrual for estimated future site remediation (See Note Q). In addition, we have deferred

Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

\$8.1 million of insurance recoveries associated with the environmental costs as regulatory liabilities. We included total actual remediation costs incurred net of the related insurance recoveries in our 2006 rate case. We began amortizing these costs upon receiving PSCW approval in January 2006. The amortization period for these costs is five years.

As part of Wisconsin Energy's PTF strategy, the PSCW approved the retirement and removal of the Port Washington Power Plant coal units to make way for construction of gas-fired facilities. In a September 27, 2003 order, the PSCW authorized transferring the undepreciated costs and related removal amounts to a regulatory asset account. The escrowed unrecovered plant costs totaled \$31.6 million at December 31, 2006.

D -- VARIABLE INTEREST ENTITIES

Under FIN 46 and FIN 46R, the primary beneficiary of a variable interest entity must consolidate the related assets and liabilities.

We continue to evaluate our tolling and purchased power agreements with third parties on a quarterly basis. After making an exhaustive effort, we concluded that for three of these agreements, we are unable to obtain the information necessary to determine whether these entities are variable interest entities. Pursuant to the terms of two of the three agreements, we deliver fuel to the entity's facilities and receive electric power. We pay the entity a "toll" to convert our fuel into the electric energy. The output of the facility is available for us to dispatch during the term of the respective agreement. In the other agreement, we have rights to the firm capacity of the entity's facility. We have approximately \$603.0 million of required payments over the remaining term of these three agreements, which expire over the next 16 years. We believe the required payments will continue to be recoverable in rates. We account for one of these agreements as a capital lease.

In April 2006, the FASB issued FSP FIN 46R-6. As required, we adopted FSP FIN 46R-6 effective July 1, 2006 for any new arrangements entered into after the effective date. Although the adoption of FSP FIN 46R-6 did not have a material financial impact in the current period, we currently are unable to determine the potential impact in future periods.

E -- INCOME TAXES

The following table is a summary of income tax expense for each of the years ended December 31:

Income Taxes	2006 (Millions o	2005 of Dollars)
Current tax expense Deferred income taxes, net Investment tax credit, net Total Income Tax Expense	\$228.2 (55.4) (3.9) \$168.9	\$145.6 24.1 (4.2) \$165.5

The provision for income taxes for each of the years ended December 31 differs from the amount of income tax determined by applying the applicable U.S. statutory federal income tax rate to income before income taxes and preferred dividend as a result of the following:

	20	006	20	05
Income Tax Expense	Amount	Effective Tax Rate (Millions of	Amount of Dollars)	Effective Tax Rate
Expected tax at statutory federal tax rates	\$155.6	35.0%	\$157.2	35.0%
State income taxes net of federal tax benefit Investment tax credit restored Other, net Total Income Tax Expense	22.6 (3.9) (5.4) \$168.9	5.1% (0.9%) (1.2%) 38.0%	20.9 (4.2) (8.4) \$165.5	4.7% (0.9%) (1.9%) 36.9%

Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

The components of SFAS 109 deferred income taxes classified as net current liabilities and net long-term liabilities at December 31 are as follows:

		<u>2005</u> f Dollars)
Deferred Tax Assets		•
Current		
Employee benefits and compensation	\$10.7	\$10.2
Recoverable gas costs	7.5	1.3
Other	2.1	5.7
Total Current Deferred Tax Assets	\$20.3	\$17.2
Non-current		
Decommissioning trust	98.1	85.8
Employee benefits and compensation	95.8	99.7
Construction advances	84.8	71.6
Deferred revenues	84.2	28.3
Emission allowances	19.0	18.4
Property-related	7.2	7.2
Other	9.2	15.2
Total Non-current Deferred Tax Assets	398.3	326.2
Total Deferred Tax Assets	\$418.6	\$343.4
Deferred Tax Liabilities		
Current	•	
Prepaid items	\$35.1	\$32.3
Uncollectible account expense	9.1	7.3
Total Current Deferred Tax Liabilities	\$44.2	\$39.6
Non-current		
Property-related	760.6	746.3
Deferred transmission costs	76.5	64.6
Investment in transmission affiliate	38.9	35.4
Other	32.4	33.1
Total Non-current Deferred Tax Liabilities	908.4	879.4
Total Deferred Tax Liabilities	\$952.6	\$919.0
Consolidated Balance Sheet Presentation	2006	2005
Current Deferred Tax Asset (Liability)	(\$23.9)	(\$22.4)
Non-current Deferred Tax Asset (Liability)	(\$510.1)	(\$553.2)
((4510.1)	(4000.21)

Consistent with ratemaking treatment, deferred taxes are offset in the above table for temporary differences which have related regulatory assets or liabilities.

In July 2006, the FASB issued FIN 48, an interpretation of SFAS 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the enterprise's financial statements in accordance with SFAS 109. FIN 48 provides clarification on the accounting for income taxes by setting forth a minimum recognition threshold an uncertain tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. We adopted FIN 48 effective January 1, 2007. As a result of the adoption of FIN 48, we estimate that the cumulative effect on retained earnings is immaterial.

Wisconsin Electric Power Company	NOTES TO FINANCIAL STATEMENTS (Continued)	

F -- NUCLEAR OPERATIONS

Point Beach Nuclear Plant: We own two 518 MW electric generating units at Point Beach in Two Rivers, Wisconsin. NMC operates the units on our behalf. The units were placed in service in the early 1970's and the original operating licenses were effective through 2010 and 2013. In December 2005, the NRC renewed the operating licenses through October 2030 for Unit 1 and March 2033 for Unit 2.

Proposed Sale of Point Beach: In December 2006, we announced that we signed a definitive agreement with an affiliate of FPL to sell Point Beach for approximately \$998 million, subject to closing price adjustments. Under the terms of the sale, the buyer would assume the obligation to decommission the plant, and we would transfer assets in a qualified trust for decommissioning. We would retain assets in a non-qualified decommissioning trust. We also entered into a long-term power purchase agreement to purchase all of the existing capacity and energy of the plant, which will become effective upon closing of the sale. We will have the unilateral option, subject to PSCW direction, to select a term for the power purchase agreement of either (i) an estimated 23 years for Unit 1 and 26 years for Unit 2, or (ii) 16 years for Unit 1 and 17 years for Unit 2. The sale of the plant and the long-term power purchase agreement are subject to review and approval by various regulatory agencies including the NRC, PSCW, MPSC and FERC. We anticipate closing the sale during the third quarter of 2007. We have submitted a request to the PSCW to defer any gain (net of transaction related costs) as a regulatory liability that would be applied to the benefit of our customers in future rate proceedings.

Nuclear Insurance: The Price-Anderson Act currently limits the total public liability for damages arising from a nuclear incident at a nuclear power plant to approximately \$10.8 billion, of which \$300 million is covered by liability insurance purchased from private sources. The remaining \$10.5 billion is covered by an industry retrospective loss sharing plan whereby, in the event of a nuclear incident resulting in damages exceeding the private insurance coverage, each owner of a nuclear plant would be assessed a deferred premium of up to \$100.6 million per reactor with a limit of \$15 million per reactor within one calendar year. We have two reactors. We are obligated to pay our proportionate share of any such assessment as long as we own Point Beach.

Through our membership in NEIL, we carry decontamination, property damage and decommissioning shortfall insurance covering losses of up to \$2.1 billion at Point Beach. Under policies issued by NEIL, the insured member may be liable for a retrospective premium in the event of catastrophic losses exceeding the full financial resources of NEIL. Our maximum retrospective liability under the above policies is \$17.8 million.

We also maintain insurance with NEIL through which we can recover up to \$3.5 million per week, subject to a total limit of \$490 million, during any prolonged outage at Point Beach caused by accidental property damage. Our maximum retrospective liability under this policy is \$9.8 million.

It should not be assumed that, in the event of a major nuclear incident, any insurance or statutory limitation of liability would protect us from material adverse impact.

Nuclear Decommissioning: We record decommissioning expense in amounts equal to the amounts collected in rates and funded to the external trusts. Nuclear decommissioning costs are accrued over the expected service lives of the nuclear generating units and are included in electric rates. Decommissioning funding was \$17.6 million for each of the years ended 2006 and 2005. As of December 31, 2006, our non-qualified investments were \$303.7 million and our qualified investments were \$577.9 million. We had the following investments in nuclear decommissioning trusts, stated at fair value as of December 31, 2006 and 2005.

	2006	2005
	(Millions of	Dollars)
Funding and Realized Earnings Net Unrealized Gains Total Investments	\$607.2 274.4 \$881.6	\$566.6 215.5 \$782.1

As of December 31, 2006, approximately 66.5% of the trust funds were invested in equity securities and 33.5% were invested in debt securities. In accordance with SFAS 115, our debt and equity security investments in the trusts are classified as available for sale.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
	(1) X An Original	(Mo, Da, Yr)	
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4
NOTES TO FINANCIAL STATEMENTS (Continued)			

Gains and losses on the fund are determined on the basis of specific identification; net unrealized gains on the fund are recorded as part of the fund. Our investments in the trusts are recorded at fair value and we are allowed regulatory treatment for the fair value adjustment. Realized gains and losses for the years ended December 31, 2006 and 2005 were as follows:

	2006	2005
	(Millions of	Dollars)
Realized Gains	\$21.2	\$19.1
Realized (Losses)	(10.6)	(9.1)
Net Realized Gain	\$10.6	\$10.0

Total gains and total losses by security type for the years ended December 31, 2006 and 2005 were as follows:

December 31, 2006	Total Gains	Total (Losses)	Net Gain (Loss)
Debt	\$1.4	(\$5.2)	(\$3.8)
Equity	296.5	(7.7)	288.8
Total	\$297.9	(\$12.9)	\$285.0
December 31, 2005	Total Gains	Total (Losses)	Net Gain (Loss)
Debt	\$2.1	(\$5.0)	(\$2.9)
Equity	236.5	<u>(8.1)</u>	<u>228.4</u>
Total	_\$238.6	<u>(</u> \$13.1)	<u>\$225.5</u>

The contractual maturities of debt securities at December 31, 2006 are as follows: \$14.8 million in 2007; \$52.0 million in 2008-2011; \$97.9 million in 2012-2016; and \$125.2 million thereafter.

The PSCW requires us to perform periodic Decommissioning Cost Studies to evaluate the funded status of our nuclear decommissioning trusts as compared with the estimated costs to perform the decommissioning work. In June 2005, we filed a new Decommissioning Cost Study with the PSCW. The study was performed by an outside consultant and it included several assumptions as to the timing and scope of the decommissioning work. This study estimated that the cost to decommission the plant would be \$712.5 million in 2004 dollars. A prior study had estimated the cost to be \$1.1 billion in 2003 dollars. The reduction in the estimated costs to decommission the plant was driven by several factors including the timing and the scope of the work to be performed.

The June 2005 Decommissioning Cost Study was also used to estimate our ARO for nuclear decommissioning. We record an ARO for future decommissioning costs based upon the net present value of the expected cash flows associated with our legal obligation to decommission our plants. Under SFAS 143, certain costs included in the June 2005 Decommissioning Cost Study that related to fuel management and non-nuclear demolition were excluded from the ARO calculation. Using the June 2005 study, our estimated costs for decommissioning, following SFAS 143, were \$473.2 million. Our ARO for nuclear decommissioning as of December 31, 2006 was \$325.6 million.

We recover decommissioning costs in our regulated rates. We have established a regulatory liability to reflect the difference between nuclear decommissioning costs recovered in rates and cumulative investment gains (our nuclear decommissioning trust investments) in comparison to the ARO for nuclear decommissioning that is calculated under SFAS 143. For further information on AROs, see Note I.

The ultimate timing and amount of future cash flows associated with nuclear decommissioning is dependent upon many significant variables including the scope of work involved, the ability to relicense the plants in the future, future inflation rates and discount rates. Because of our announced agreement to sell Point Beach to an affiliate of FPL, we do not expect to remain obligated to decommission Point Beach if the sale is consummated. However, if that sale is not completed, based on the license renewal received by the NRC in December 2005, we do not expect to make any significant nuclear decommissioning expenditures before the year 2030.

FERC FORM NO. 1 (ED. 12-88)	Page 123.18

Name of Respondent	This Report is: (1) X An Original		Year/Period of Report
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4
	OTES TO FINANCIAL STATEMENTS (Continued)	

Decontamination and Decommissioning Fund: The Energy Policy Act of 1992 established a D&D Fund for the DOE's nuclear fuel enrichment facilities. Deposits to the D&D Fund are derived in part from special assessments on utilities using enrichment services. In October 2006, a final payment was made to the DOE. As a result, a liability no longer exists for this fund. The deferred regulatory asset will be amortized to nuclear fuel expense and included in utility rates through September 2007.

G -- LONG-TERM DEBT

Debentures and Notes: As of December 31, 2006, the maturities and sinking fund requirements of our long-term debt outstanding (excluding obligations under capital leases) were as follows:

	(Millions of Dollars)
2007	\$250.0
2008	-
2009	0.1
2010	0.1
2011	-
Thereafter	1,351.4
Total	<u>\$1,601.6</u>

We amortize debt premiums, discounts and debt issuance costs over the lives of the debt and we include the costs in interest expense.

In November 2006, we issued \$300 million of 5.70% Debentures due December 1, 2036. The securities were issued under an existing \$665 million shelf registration statement filed with the SEC. The net proceeds from the sale were used to retire our \$200 million of 6-5/8% Debentures due November 15, 2006 at their scheduled maturity and to repay outstanding commercial paper incurred for working capital requirements.

Capital Leases: In 1997, we entered into a 25-year power purchase contract with an unaffiliated independent power producer. The contract, for 236 MW of firm capacity from a gas-fired cogeneration facility, includes no minimum energy requirements. When the contract expires in 2022, we may, at our option and with proper notice, renew for another ten years or purchase the generating facility at fair value or allow the contract to expire. We account for this contract as a capital lease and recorded the leased facility and corresponding obligation under the capital lease at the estimated fair value of the plant's electric generating facilities. We are amortizing the leased facility on a straight-line basis over the original 25-year term of the contract.

We treat the long-term power purchase contract as an operating lease for rate-making purposes and we record our minimum lease payments as purchased power expense on the Consolidated Income Statements. We paid a total of \$26.1 million and \$25.2 million in minimum lease payments during 2006 and 2005, respectively. We record the difference between the minimum lease payments and the sum of imputed interest and amortization costs calculated under capital lease accounting as a deferred regulatory asset on our Consolidated Balance Sheets (see Regulatory Assets - Deferred plant related - capital leases in Note C). Due to the timing and the amounts of the minimum lease payments, we expect the regulatory asset to increase to approximately \$78.5 million by the year 2009 at which time the regulatory asset will be reduced to zero over the remaining life of the contract. The total obligation under the capital lease was \$159.4 million at December 31, 2006 and will decrease to zero over the remaining life of the contract.

In July 2005, the first 545-MW natural gas-fired generation unit was placed in service at the PWGS. We are leasing this unit from We Power under a PSCW approved lease. Pursuant to SFAS 13, Accounting for Leases, we are accounting for this lease as a capital lease and have recorded the leased plant and corresponding obligation under the capital lease at the estimated fair value of \$335.5 million. We are amortizing the leased plant on a straight-line basis over the original 25-year term of the lease.

This lease is treated as an operating lease for rate-making purposes. We record the lease payments as rent expense in other operation and maintenance in the Consolidated Income Statement. The lease payments are expected to be recovered through our rates. The

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) X An Original	(Mo, Da, Yr)		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

recoverability of the lease payments is supported by the 2001 lease generation law. We paid a total of \$47.8 million and \$21.9 million in minimum lease payments during 2006 and 2005, respectively. We are recording a deferred regulatory asset for the difference between the lease payments and the sum of imputed interest cost and amortization costs calculated under capital lease accounting (see Regulatory Assets - Deferred plant related - capital leases in Note C). Due to the timing and the amounts of the minimum lease payments, we expect the regulatory asset to increase to approximately \$125.1 million in the year 2021 at which time the regulatory asset will be reduced to zero over the remaining life of the contract. The total obligation under the capital lease was \$333.5 million at December 31, 2006 and will decrease to zero over the remaining life of the contract.

We also have a nuclear fuel leasing arrangement with Wisconsin Electric Fuel Trust (Trust) which is treated as a capital lease. We lease and amortize the nuclear fuel to fuel expense as power is generated, generally over a period of 60 months. Lease payments include charges for the cost of fuel burned, financing costs and management fees. In the event that we or the Trust terminates the lease, the Trust would recover its unamortized cost of nuclear fuel from us. Under the lease terms, we are in effect the ultimate guarantor of the Trust's commercial paper and line of credit borrowings that finance the investment in nuclear fuel. We recorded \$4.2 million and \$1.7 million of interest expense on the nuclear fuel lease in fuel expense during 2006 and 2005, respectively.

Following is a summary of our capitalized leased facilities and nuclear fuel at December 31.

Capital Lease Assets	_2006_	_2005_
	(Millions of	Dollars)
Leased Facilities		
Long-term purchase power commitment	\$140.3	\$140.3
Accumulated amortization	(52.8)	(47.1)

	\$157.4	<u>\$331.5</u>	_\$45.6	<u>\$534.5</u>

H -- SHORT-TERM DEBT

Short-term notes payable balances and their corresponding weighted-average interest rates as of December 31 consist of:

	2006		200	5
		Interest		Interest
Short-Term Debt	Balance	Rate_	<u>Balance</u>	Rate
	(Million	ns of Dollars, ex	cept for percenta	ages)
Commercial Paper	\$274.1	5.37%	\$322.2	4.39%
Other	30.1	6.36%	30.5	6.66%
Total Short-Term Debt	\$304.2	5.47%	<u>\$352.7</u>	4.59%

On December 31, 2006, we had approximately \$485.9 million of available unused lines under our bank back-up credit facility. Our bank back-up credit facility expires in March 2011.

The following information relates to commercial paper outstanding for the years ended December 31, 2006 and 2005:

	2006	2005
	(Millions of Dollars, exce	ept for percentages)
Maximum Commercial Paper Outstanding	\$369.9	\$324.9
Average Commercial Paper Outstanding	\$174.2	\$117.8
Weighted Average Interest Rate	5.02%	3.26%

We have entered into a bank back-up credit agreement to maintain short-term credit liquidity which, among other terms, requires us to maintain, subject to certain exclusions, a minimum total funded debt to capitalization ratio of less than 65%.

FERC FORM NO. 1 (ED. 12-88)	Page 123.21

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) X An Original	(Mo, Da, Yr)		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

Our bank back-up credit agreement contains customary covenants, including certain limitations on our ability to sell assets. The credit agreement also contains customary events of default, including payment defaults, material inaccuracy of representations and warranties, covenant defaults, bankruptcy proceedings, certain judgments, ERISA defaults and change of control.

At December 31, 2006, we were in compliance with all covenants.

I -- ASSET RETIREMENT OBLIGATIONS

The following table presents the change in our AROs during 2006.

	Balance at December 31, 2005	Liabilities Incurred	Liabilities <u>Settled</u> (Millions of Doll	Accretion ars)	Balance at December 31, 2006
Asset Retirement Obligations	\$354.9	\$ -	(\$2.1)	\$18.3	\$371.1

SFAS 143 primarily applies to the future decommissioning costs for Point Beach. Prior to January 2003, we recorded a long-term liability for accrued nuclear decommissioning costs. See Note F for further information about the nuclear decommissioning of Point Beach, including our investments in nuclear decommissioning trusts that are restricted to nuclear decommissioning.

In March 2005, the FASB issued FIN 47. FIN 47 defines a conditional ARO as a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. We adopted FIN 47 effective December 31, 2005. At adoption, we recorded additional AROs related to asbestos removal costs.

The adoption of FIN 47 had no impact on our net income in 2006 or 2005. As it relates to our regulated operations, we apply SFAS 71 and recognize regulatory assets or liabilities for the timing differences between when we recover legal AROs in rates and when we would recognize these costs under FIN 47. This treatment is consistent with the adoption of SFAS 143 for our regulated operations.

J -- DERIVATIVE INSTRUMENTS

We follow SFAS 133 as amended by SFAS 149, which requires that every derivative instrument be recorded on the balance sheet as an asset or liability measured at its fair value and that changes in the derivative's fair value be recognized currently in earnings unless specific hedge accounting criteria are met. For most energy related physical and financial contracts in our regulated operations that qualify as derivatives under SFAS 133, the PSCW allows the effects of the fair market value accounting to be offset to regulatory assets and liabilities. As of December 31, 2006, we recognized \$18.5 million in regulatory assets related to derivatives in comparison to \$2.2 million at December 31, 2005.

We had a limited number of financial contracts that are defined as derivatives under SFAS 133 and qualify for cash flow hedge accounting. These contracts were utilized to manage the cost of gas for utility operations. Changes in the fair market values of these instruments were recorded in Accumulated Other Comprehensive Income. At the date the underlying transaction occurs, the amounts in Accumulated Other Comprehensive Income were reported in earnings.

For the year ended December 31, 2005 the amount of hedge ineffectiveness was immaterial. We did not exclude any components of derivative gains or losses from the assessment of hedge effectiveness.

	(1) X An Original	(Mo, Da, Yr)		
Wisconsin Electric Power Company	(2) A Resubmission	03/31/2007	2006/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

K -- FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount and estimated fair value of certain of our recorded financial instruments at December 31 are as follows:

	2006		2005	
Financial Instruments	Carrying Amount	Fair Value (Millions o	Carrying Amount of Dollars)	Fair Value
Nuclear decommissioning assets Preferred stock, no redemption required	\$881.6 \$30.4	\$881.6 \$22.6	\$782.1 \$30.4	\$782.1 \$22.6
Long-term debt including current portion	\$1,601.6	\$1,588.9	\$1,505.5	\$1,526.1

The carrying value of cash and cash equivalents, net accounts receivable, accounts payable and short-term borrowings approximates fair value due to the short-term nature of these instruments. The nuclear decommissioning assets are carried at fair value as reported by the trustee (see Note F). The fair value of our preferred stock is estimated based upon the quoted market value for the same or similar issues. The fair value of our long-term debt, including the current portion of long-term debt but excluding capitalized leases, is estimated based upon quoted market value for the same or similar issues or upon the quoted market prices of U.S. Treasury issues having a similar term to maturity, adjusted for the issuing company's bond rating and the present value of future cash flows. The fair values of derivative financial instruments and associated margin accounts are equal to their carrying values as of December 31, 2006.

L -- BENEFITS

Pensions and Other Post-retirement Benefits: We participate in Wisconsin Energy's noncontributory defined benefit pension plans that cover substantially all of our employees. The plans provide defined benefits based upon years of service and final average salary. In October 2006, Wisconsin Energy announced that it was making a change to pension benefits for new management employees hired subsequent to October 2006 and for those represented employees whose unions have adopted this plan. The retirement benefit for new employees is an enhanced 401(k) plan. Existing employee's pension benefits are unchanged. Our 2007 combined pension and savings plan costs are not expected to be materially affected as a result of this change to the plan.

We also participate in Wisconsin Energy's OPEB plans that cover substantially all of our employees. The health care plans are contributory with participants' contributions adjusted annually; the life insurance plans are noncontributory. The accounting for the health care plans anticipates future cost-sharing changes to the written plans that are consistent with our expressed intent to maintain the current cost sharing levels. The post-retirement health care plans include a limit on our share of costs for recent and future retirees. Wisconsin Energy uses a year end measurement date for all of the pension and OPEB plans.

The assets, obligations and the components of our pension costs are allocated by Wisconsin Energy's actuary to each of the participating companies as if each participating company had its own plan. The disclosures below are based on an allocation to us of the amounts for Wisconsin Energy's pension plan.

In September 2006, the FASB issued SFAS 158, which requires employers to recognize all obligations related to their pension and OPEB plans and to quantify the funded status of the pension and OPEB plans as an asset or liability on their statement of financial position. In addition, SFAS 158 requires employers to measure the funded status of their plans as of the date of their year-end statement of financial position.

Wisconsin Energy adopted SFAS 158 prospectively on December 31, 2006. Wisconsin Energy has historically and will continue to use a year end measurement date for all of the benefit plans. Prior to the issuance of SFAS 158, we recorded a minimum pension liability to reflect the funded status of the pension plan. Due to the regulatory nature of our business, we have concluded that

men were man, 485.		Do B A	-48	1 ham 8.0	49 00

substantially all of the unrecognized costs resulting from the recognition of the funded status of the pension and OPEB plans qualify as a regulatory asset.

The following table shows the incremental effect of applying SFAS 158 on individual line items in our year-end statement of financial position and compares prior year-end balances:

Weighted-Average assumptions used to determine net cost for year ended Dec 31 Discount rate Expected return on plan assets Rate of compensation increase	5.50% 8.5 4.5 to 5.0	5.75% 9.0 4.5 to 5.0	5.50% 8.5 4.5 to 5.0	5.75% 9.0 4.5 to 5.0
Assumed health care cost trend rates at Dec 31 Health care cost trend rate assumed for next year (Pre 65 / Post 65) Rate that the cost trend rate gradually adjusts to Year that the rate reaches the rate it is assumed to remain at			9/11 5 2011	10 5 2011

The expected long-term rate of return on plan assets was 8.5% in 2006 and 9% in 2005. This return expectation on plan assets was determined by reviewing actual pension historical returns as well as calculating expected total trust returns using the weighted average of long-term market returns for each of the asset categories utilized in the pension fund.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) X An Original	(Mo, Da, Yr)		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

Other Post-retirement Benefits Plans: We use various Employees' Benefit Trusts to fund a major portion of OPEB. The majority of the trusts' assets are mutual funds or commingled indexed funds.

A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1% Increase	1% Decrease
	(Millions o	of Dollars)
Effect on		
Post-retirement benefit obligation	\$25.2	(\$21.1)
Total of service and interest cost components	\$3.7	(\$3.0)

In December 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Act) was signed into law. The Act introduced a prescription drug benefit program under Medicare as well as a federal subsidy to sponsors of retiree health care benefit plans. In 2004, the FASB issued FSP SFAS 106-2.

In 2004, in accordance with FSP SFAS 106-2, we chose to recognize the effects of the Act retroactively effective January 1, 2004. Calculated actuarially, the Act resulted in a reduction of \$20.6 million in our benefit obligation. In addition, we recorded a reduction to SFAS 106 expense of \$4.2 million in 2004. In January 2005, the Centers for Medicare & Medicaid Services released final regulations to implement the new prescription drug benefit under Part D of Medicare. It was determined that our employer sponsored plans met these regulations and that the previously determined actuarial measurements do not need to be revised.

In October 2005, we announced that we were offering to our retirees a Medicare Advantage program as an option within our existing post-retirement medical and drug plans. The Medicare Advantage program is part of the Act, and offers post-65 medical and drug benefits through private insurance carriers. The Medicare Advantage program is expected to reduce the cost of post-65 medical and drug costs for our retirees and the Company. Due to this change, we remeasured the fair value of our OPEB plans in the fourth quarter of 2005 in accordance with SFAS 106. In 2005, the impact of this remeasurement and the FSP SFAS 106-2 benefit was approximately a \$4.1 million reduction to SFAS 106 expense.

Plan Assets: In our opinion, current pension trust assets and amounts which are expected to be contributed to the trusts in the future will be adequate to meet pension payment obligations to current and future retirees. The pension plans asset allocation at December 31, 2006 and 2005, and the target allocation for 2007, by asset category, are as follows:

	Target Allocation	Actual Allo	ocation
Asset Category	2007	2006	2005
Equity Securities	65%	61%	65%
Debt Securities	<u>35%</u>	39%_	35%
Total	_100%_	100%	_100%_

Our OPEB plans asset allocation at December 31, 2006 and 2005, and our target allocation for 2007, by asset category, are as follows:

	Target Allocation	Actual Alle	ocation
Asset Category	2007	2006	2005
Equity Securities	54%	32%	32%
Debt Securities	46%	68%	67%
Other			1%
Total	<u>_100%</u>	<u>100%</u>	<u> 100%</u>

Wisconsin Energy's common stock is not included in equity securities. Investment managers are specifically prohibited from investing

Name of Respondent	This Report is: (1) X An Original	Date of Report (Mo, Da, Yr)	Year/Period of Report
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4
	NOTES TO FINANCIAL STATEMENTS (Continued)	

in our securities or any affiliate of ours except if part of a commingled fund or index fund.

The target asset allocations were established by an Investment Trust Policy Committee, which oversees investment matters related to all of our funded benefit plans. The asset allocations are monitored by the Investment Trust Policy Committee.

Cashflows:

Employer Contributions	Pension (Millions o	OPEB f Dollars)
2005	\$2.9	\$9.1
2006	\$58.2	\$12.5

Based on our PSCW approved funding policy and current IRS funding requirements, we expect to contribute \$36.5 million to fund pension benefits and \$11.2 million to fund OPEB plans in 2007. Of the \$36.5 million expected to be contributed to fund pension benefits in 2007, we estimate \$32.4 million will be for our qualified pension plans. We contributed \$54.0 million to our qualified pension plans during 2006. We did not make a contribution to our qualified pension plan during 2005.

The entire contribution to the OPEB plans during 2006 was discretionary as the plans are not subject to any minimum regulatory funding requirements.

The following table identifies our expected benefit payments over the next 10 years:

			Expected Medicare
			Part D
Year	Pension	Gross OPEB	Subsidy
		(Millions of Dollars)	
2007	\$72.0	\$13.8	(\$1.0)
2008	\$77.7	\$14.2	(\$0.8)
2009	\$80.4	\$13.0	-
2010	\$81.2	\$14.3	-
2011	\$92.3	\$15.6	-
2012-2016	\$453.9	\$96.8	-

Savings Plans: We sponsor savings plans which allow employees to contribute a portion of their pre-tax and or after-tax income in accordance with plan-specified guidelines. Under these plans, we expensed matching contributions of \$9.3 million and \$9.5 million during 2006 and 2005, respectively.

Severance Plans: In 2004, we incurred \$22.3 million (\$13.4 million after-tax) of severance costs. The majority of the severance costs related to an enhanced severance package offered to selected management employees of Wisconsin Energy and its subsidiaries who voluntarily resigned in the fourth quarter of 2004. The program was enacted to help reduce the upward pressure on operating expenses.

Approximately 150 employees received severance benefits during 2004. At December 31, 2004, we accrued \$6.6 million for severance benefits. As of December 31, 2006, all of the severance related benefits were paid.

M -- GUARANTEES

We enter into various guarantees to provide financial and performance assurance to third parties. As of December 31, 2006, we had the following guarantees:

Maximum		
Potential		Liability
Future	Outstanding at	Recorded at
Payments	Dec 31, 2006	Dec 31, 2006
	(Millions of Dollars)	
\$235.2	\$0.1	\$ -

We guarantee the potential retrospective premiums that could be assessed under our nuclear insurance program (See Note F).

Postemployment benefits: Postemployment benefits provided to former or inactive employees are recognized when an event occurs. The estimated liability, excluding severance benefits, for such benefits was \$9.0 million as of December 31, 2006.

N -- COMMON EQUITY

Guarantees

Share-Based Compensation Plans: Employees of Wisconsin Electric participate in a plan approved by Wisconsin Energy stockholders that provides a long-term incentive through equity interests in Wisconsin Energy, to outside directors, selected officers and key employees of Wisconsin Energy and its subsidiaries. The plan provides for the granting of Wisconsin Energy stock options, stock appreciation rights, restricted stock awards and performance shares. Awards may be paid in Wisconsin Energy common stock, cash or a combination thereof.

The following is a summary of Wisconsin Energy stock options held by our employees and issued through December 31, 2006:

	2006		200)5

Aggregate Intrinsic Value (Millions) Options Outstanding
December 31, 2006 \$100.3 \$76.3

In January 2007, the Compensation Committee awarded 1,247,760 non-qualified Wisconsin Energy stock options at the average market price of \$47.76 to our officers and key employees under its normal schedule of awarding long-term incentive compensation.

We utilize the straight-line attribution method for recognizing stock-based compensation expense under SFAS 123R. We recorded compensation expense, net of tax, for stock option awards made to our officers and other key employees of \$4.1 million for the twelve months ended December 31, 2006.

The aggregate intrinsic value of stock options exercised during the twelve months ended December 31, 2006 was approximately \$16.0 million. Tax benefits associated with our stock option awards for the twelve months ended December 31, 2006 were \$6.4 million.

The exercise price of a Wisconsin Energy stock option under the plan is to be no less than 100% of the common stock's fair market value on the grant date and options may not be exercised within six months of the grant date except in the event of a change in control. In December 2004, the Compensation Committee approved the acceleration of vesting of all unvested options awarded to our officers and other key employees in 2002, 2003 and 2004. In addition, the Compensation Committee determined that future option grants would be non-qualified stock options and they would vest on a cliff-basis after a three year period. The stock options that were granted prior to 2005 generally vest on a straight line basis over a four year period. Generally, options expire no later than ten years from the date of grant. For further information regarding the accounting changes related to stock based compensation, see Note A and Note B.

On December 31, 2005, the value of our non-vested Wisconsin Energy stock options outstanding was \$9.6 million, or \$8.32 per share on a weighted average grant date fair value basis. On December 31, 2006, the value of our Wisconsin Energy non-vested stock options outstanding was \$18.0 million or \$7.93 per share on a weighted average grant date fair value basis. During the year, 19,047 stock options vested and 26,931 stock options were forfeited on a weighted average grant date fair value of \$7.71 and \$7.94, respectively.

As of December 31, 2006, total compensation costs related to non-vested stock options not yet recognized was approximately \$8.0 million, which is expected to be recognized over the next 19 months on a weighted-average basis.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) X An Original	(Mo, Da, Yr)	·		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4		
NOT	NOTES TO FINANCIAL STATEMENTS (Continued)				

The Compensation Committee has also approved Wisconsin Energy restricted stock grants to certain of our key employees and directors. The following restricted stock activity related to our employees occurred during 2006 and 2005:

	20	2006		05
D. W. i. a left	Number of	Weighted- Average Market	Number of	Weighted- Average Market
Restricted Shares	Shares	Price_	Shares	<u>Price</u>
Outstanding at January 1	150,772		180,614	
Granted	2,500	\$40.35	-	\$ -
Released / Forfeited	(21,327)	\$26.91	(29,842)	\$28.77
Outstanding at December 31	131,945		150,772	

Recipients of the Wisconsin Energy restricted shares, who have the right to vote the shares and to receive dividends, are not required to provide consideration to us other than rendering service. Forfeiture provisions on the restricted stock generally expire 10 years after award grant subject to an accelerated expiration schedule for some of the shares based on the achievement of certain financial performance goals.

We record the market value of the restricted stock awards on the date of grant and then we charge their value to expense over the vesting period of the awards. We also adjust expense for acceleration of vesting due to achievement of performance goals. We recorded compensation expense, net of tax, for restricted stock awards made to our employees and directors of \$0.2 million for the twelve months ended December 31, 2006. Tax benefits realized for our restricted stock awards were \$0.3 million for the twelve months ended December 31, 2006. As of December 31, 2006, total compensation cost related to non-vested restricted stock awards not yet recognized was approximately \$1.6 million, which is expected to be recognized over the next 62 months on a weighted-average basis.

In January 2004, the Compensation Committee granted 139,793 Wisconsin Energy performance shares to our officers and other key employees. In January 2007, 2006 and 2005, the Compensation Committee granted 124,160, 134,818 and 90,739 Wisconsin Energy performance units to our officers and other key employees under the Wisconsin Energy Performance Unit Plan. Under the grants, the ultimate number of units which will be awarded is dependent upon the achievement of certain financial performance of Wisconsin Energy's common stock over a three year period. Under the terms of the award, participants may earn between 0% and 175% of the base performance award. We are accruing compensation costs over the three year period based on an estimate of the final expected value of the award. In July 2006, the Compensation Committee amended the terms of the performance shares to allow the recipients of 2004 grants to receive cash or common stock upon settlement. The 2005, 2006 and 2007 grants will be settled in cash. We recorded compensation expense, net of tax, for performance awards made to our employees of \$3.6 million for the twelve months ended December 31, 2006. We have not realized any tax benefits associated with our performance awards during the twelve months ended December 31, 2006. As of December 31, 2006, total compensation cost related to non-vested performance awards not yet recognized was approximately \$5.5 million, which is expected to be recognized over the next 21 months on a weighted-average basis. Our portion of the consolidated final value of the 2004 performance share award was approximately \$6.5 million, which was paid to our officers and key employees in January 2007.

Equity Contribution: Our capitalization reflects the impact of an equity contribution from Wisconsin Energy. An equity contribution of \$100.0 million was made during the second quarter of 2006.

Restrictions: Our January 2006 rate order from the PSCW requires us to maintain a capital structure (i.e., the percentage by which each of common stock, preferred stock and debt constitute the total capital invested in the utility), which has a common equity ratio range of between 48.5% and 53.5% (including certain off-balance sheet obligations and capitalized leases, but excluding the PWGS 1 capitalized lease). As of December 31, 2006, our restricted net assets were approximately \$2.2 billion. Previously in a June 2004 decision, the PSCW determined that we must obtain specific approval to pay dividends that exceed normal levels as long as any tax issue or appeals related to the sale of Wisconsin Energy's manufacturing business and/or the conversion of Wisconsin Gas to a limited liability company remain outstanding. The PSCW may modify such provisions by a future order.

Name of Respondent	This Report is: (1) X An Original	Date of Report (Mo, Da, Yr)	Year/Period of Report		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

We may not pay common dividends to Wisconsin Energy under our Restated Articles of Incorporation if any dividends on our outstanding preferred stock have not been paid. In addition, pursuant to the terms of our 3.60% Serial Preferred Stock, our ability to declare common dividends would be limited to 75% or 50% of net income during a twelve month period if our common stock equity to total capitalization, as defined, is less than 25% and 20%, respectively.

See Note H for discussion of certain financial covenants related to our bank back-up credit agreements.

We do not believe that these restrictions will materially affect our operations or limit any normal dividend payments in the foreseeable future.

O -- SEGMENT REPORTING

We are a wholly-owned subsidiary of Wisconsin Energy and have organized our operating segments according to how we are currently regulated. Our reportable operating segments include electric, natural gas and steam utility segments. The accounting policies of the reportable operating segments are the same as those described in Note A.

Our electric utility engages in the generation, distribution and sale of electric energy in southeastern (including metropolitan Milwaukee), east central and northern Wisconsin and in the Upper Peninsula of Michigan. Our natural gas utility is engaged in the purchase, distribution and sale of natural gas to retail customers and the transportation of customer-owned natural gas in three service areas in southeastern, east central and northern Wisconsin. Our steam utility produces, distributes and sells steam to space heating and processing customers in the Milwaukee, Wisconsin area.

- (a) Other includes primarily non-utility property and investments, materials and supplies, deferred charges and other corporate items.
- (b) We account for intersegment revenues at a tariff rate established by the PSCW. Intersegment revenues are not material.
- (c) We evaluate operating income to manage our utility business. Equity in Earnings of Transmission Affiliate, Interest Expense and Income Taxes are not included in segment operating income.
- (d) Common utility plant is allocated to electric, gas and steam utility operations to determine segment assets (see Note A).

P -- RELATED PARTIES

We provide to and receive from certain of our Wisconsin Energy affiliates managerial, financial, accounting, legal, data processing and other services in accordance with service agreements approved by the PSCW. In addition, we make lease payments to We Power for PWGS 1 and the other generating facilities being constructed under Wisconsin Energy's PTF strategy, and we sell electric energy to an affiliated utility, Edison Sault. We also receive and/or provide certain services to other associated companies in which we have, or Wisconsin Energy has, an equity investment.

ATC: As of December 31, 2006, we have a 25.8% interest in ATC. We pay ATC for transmission and other related services it provides. In addition, we provide a variety of operational, maintenance and project management work for ATC, which are reimbursed to us by ATC. Under Wisconsin Energy's PTF plan, we are required to pay the cost of needed transmission infrastructure upgrades. ATC will reimburse us for these costs when the units are placed into service. At December 31, 2006 and 2005, we had a receivable of \$27.2 million and \$19.4 million, respectively, for these items.

NMC: At December 31, 2006, NMC, which operates Point Beach, was owned by Wisconsin Energy's affiliate, WEC Nuclear

Name of Respondent	This Report is: (1) X An Original	Date of Report (Mo, Da, Yr)	Year/Period of Report			
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4			
NOTES TO FINANCIAL STATEMENTS (Continued)						

Corporation, and the affiliates of two other unaffiliated investor-owned utilities in the region. We pay NMC a plant operating charge. In December 2006, we announced our intention to sell Point Beach to an affiliate of FPL. If and when the sale is completed (or earlier if an interim operating agreement with FPL is activated by us), the operating licenses for Point Beach will transfer from NMC to the buyer and our relationship with NMC will be terminated.

Guardian: In April 2006, Wisconsin Energy sold its one third ownership interest in Guardian. As such, the tables below reflect activity through April 2006 with respect to Guardian. Wisconsin Gas has committed to purchase 650,000 Dth per day of capacity under the terms of a 10 year transportation agreement expiring December 2022. Under a PSCW-approved agreement, we have purchased some of this capacity from Wisconsin Gas when they have excess, and we expect to continue to do so.

We provided and received services from the following associated companies during 2006 and 2005:

Company	2006	2005
	(Millions of	Dollars)
Wisconsin Electric Affiliate		
Net Services Provided		
-We Power (excluding lease payments)	\$3.2	\$3.8
-Wisconsin Gas	\$44.4	\$48.8
-Edison Sault (including electric energy sold)	\$22.6	\$21.5
-Minergy	\$3.6	\$8.1
-Other	\$1.5	\$1.5
Net Services Received		
-We Power (lease payments)	\$135.3	\$79.8
-Wisconsin Energy	\$9.1	\$6.6
Equity Investee		
Services Provided		
-ATC	\$15.8	\$20.0
Services Received		****
-ATC	\$145.7	\$126.8
-NMC	\$65.2	\$61.2
-Guardian	\$3.9	\$12.0

At December 31, 2006 and 2005, our consolidated balance sheets included receivable and payable balances with the following equity investee companies:

Company	2006 (Millions of	<u>2005</u> Dollars)
Equity Investee Accounts Receivable -ATC	\$1.2	\$1.2
Accounts Payable -ATC -NMC -Guardian	\$12.1 \$5.7 \$ -	\$10.3 \$2.5 \$1.0

Q -- COMMITMENTS AND CONTINGENCIES

Capital Expenditures: We have made certain commitments in connection with 2007 capital expenditures. During 2007, we estimate that total capital expenditures will be approximately \$600 million, excluding the purchase of nuclear fuel.

Operating Leases: We enter into long-term purchase power contracts to meet a portion of our anticipated increase in future electric energy supply needs. These contracts expire at various times through 2013. Certain of these contracts were deemed to qualify as operating leases. In addition, we have various other operating leases, including leases for vehicles and coal cars.

Future minimum payments for the next five years and thereafter for our operating lease contracts are as follows:

	(Millions of Donars)
2007	\$51.6
2008	35.7
2009	22.5
2010	20.5
2011	20.7
Thereafter	32.9
Total	\$183.9

(Millians of Dallars)

Environmental Matters: We periodically review our exposure for environmental remediation costs as evidence becomes available indicating that our liability has changed. Given current information, including the following, we believe that future costs in excess of the amounts accrued and/or disclosed on all presently known and quantifiable environmental contingencies will not be material to our financial position or results of operations.

We have a program of comprehensive environmental remediation planning for former manufactured gas plant sites and coal-ash disposal sites. We perform ongoing assessments of our manufactured gas plant sites and related disposal sites, as well as coal ash disposal/landfill sites. We are working with the WDNR in our investigation and remediation planning. At this time, we cannot estimate future remediation costs associated with these sites beyond those described below.

Manufactured Gas Plant Sites: We have identified several sites at which we or a predecessor company historically owned or operated a manufactured gas plant. We have substantially completed planned remediation activities at some of those sites and certain other sites are subject to ongoing monitoring. Remediation at additional sites is currently being performed, and other sites are being investigated or monitored. We have also identified other sites that may have been impacted by historical manufactured gas plant activities. Based upon ongoing analysis, we estimate that the future costs for detailed site investigation and future remediation costs may range from \$13 to \$30 million over the next ten years. This estimate is dependent upon several variables including, among other things, the extent of remediation, changes in technology and changes in regulation. As of December 31, 2006, we have established reserves of \$15.5 million related to future remediation costs.

The PSCW has allowed Wisconsin utilities, including us, to defer the costs spent on the remediation of manufactured gas plant sites, and has allowed for these costs to be recovered in rates over five years. Accordingly, we have recorded a regulatory asset for remediation costs.

Ash Landfill Sites: We aggressively seek environmentally acceptable, beneficial uses for our coal combustion by-products. However, these coal-ash by-products have been, and to a small degree, continue to be disposed in company-owned, licensed landfills. Some early designed and constructed landfills may allow the release of low levels of constituents resulting in the need for various levels of monitoring or adjusting. Where we have become aware of these conditions, efforts have been expended to define the nature and extent of any release, and work has been performed to address these conditions. The costs of these efforts are recovered under our fuel clause and are expensed as incurred. During 2006 and 2005, we incurred \$0.5 million and \$0.1 million, respectively, in coal-ash remediation expenses. As of December 31, 2006 we have no reserves established related to ash landfill sites.

Name of Respondent	This Report is: (1) X An Original	Date of Report (Mo, Da, Yr)	Year/Period of Report		
Wisconsin Electric Power Company	(2) _ A Resubmission	03/31/2007	2006/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

EPA - Proposed Consent Decree: In April 2003, we and the EPA announced that a consent decree had been reached that resolved all issues related to a request for information that had been issued by the EPA. Under the consent decree, we agreed to significantly reduce our air emissions from our coal-fired generating facilities. The reductions are expected to be achieved by 2013 through a combination of installing new pollution control equipment, upgrading existing equipment and retiring certain older units. Through December 31, 2006, we have spent approximately \$355.0 million associated with implementing the EPA agreement and the ultimate capital cost of implementing this agreement is estimated to be \$1 billion through the year 2013.

The consent decree, amended to include the State of Michigan, has been filed with a federal court for approval. Various intervenor groups have commented on the consent decree and we believe that the briefings and subsequent discovery is complete. At this time, we are unable to predict the timing or the ultimate resolution of the federal court's consideration; however, we do not believe that the ultimate resolution of this matter will have a material impact on our financial position or results of operations.

ELECTRIC PLANT IN SERVICE (Accounts 101, 102, 103, and 106)

- 1. Report below the original cost of electric plant in Service according to the prescribed accounts.
- 2. In addition to Account 101, Electric plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.
- 3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
- 4. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
- 5. Classify Account 106 according to prescribed ac-

counts, on an estimated basis if necessary and include the entries, in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements at the end of the year, include in column (d) a tentative distributions of such retirements, on an estimated basis with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d) reversals of tentaive distributions of prior year of unclassified retirements. Attach supplemental statement showing the account distributions of these tentative classifications in columns (c) and (d) including the reversals

ELECTRIC PLANT IN SERVICE (Accounts 101, 102, 103, and 106) (Continued)

of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious ommissions of the reported amount of respondent's plant actually in service at end of year.

6. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the Additions or reductions of primary Account classifications arising from distribution of amounts initially recorded in Account 102. In showing the clearance of Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits for credits distributed in column (f) to primary account classfications.

- 7. For Account 399, state the nature $% \left(1\right) =\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right) +\left(1\right$ included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirements of these pages.
- 8. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchaser, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date of such filing.

Wisconsin Electric Power Company	(2) [] A Resubmission	03/31/07	Dec. 31, 2006

NONUTILITY PROPERTY (Account 121)

- 1. Give a brief description and state the location of non-utility property included in Account 121.
- 2. Designate with a double asterisk any property which is leased to another company. State name of lessee and whether lessee is an associated company.
- 3. Furnish particulars (details) concerning sales, purchases, or transfers of Nonutility Property during the year.
- 4. List separately all property previously devoted to public service and give date of transfer to Account 121, Non-utility Property.
- 5. Minor items (5% of the Balance at the End of the Year for Account 121 or \$100,000, whichever is less) may be grouped by (1) previously devoted to public service (line 44), or (2) other nonutility property (line 45).

Wisconsin Electric Power Company	(2) [] A Resubmission	03/31/07	Dec. 31, 2006

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME
FOR FEDERAL INCOME TAXES

- 1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
- 2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group members, tax assigned to each group member, and basis of allocation, assignemnt, or sharing of the consolidated tax among the group members.

Ubility	reconciling amount.	consolidated tax among the group members.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Account 236

- 1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual or estimated amounts of such taxes are known, show the amounts in a footnote and designate whether estimated or actual amounts.
- 2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes). Enter the amounts in both
- columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
- 3. Include in column (d) taxes charged during the year taxes charged to operations and other accounts through (a accruals credited to taxes accrued, (b) amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
- 4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.

GAIN OR LOSS ON DISPOSITION OF PROPERTY (Accounts 421.1 and 421.2)

- Give a brief description of property creating the gain or loss. Include name of party acquiring the property (when acquired by another utility
 or associated company) and the date transaction was completed. Identify property by type: Leased, Held for Future Use, or Nonutility.
- 2. Individual gains or losses relating to property with an original cost of less than \$100,000 may be grouped with the number of such transactions disclosed in column (a).
- 3. Give the date of Commission approval of journal entries in column (b), when approval is required. Where approval is required but has not been received, give explanation following the item in column (a). (See account 102, Utility Plant Purchased or Sold.)

Wisconsin Electric Power Company

SALES TO ULTIMATE CUSTOMERS

- SALES TO ULTIMATE CUSTOMERS

 1. Report data by rate schedule for all sales of retail electricity (including unbilled revenues and KWH) for each account. Show totals for each account and for combined sales to ultimate customers.

 2. Report number of customers on the basis of number of meters plus the number of flat rate accounts. Where meter readings are added for billing purposes, count one customer for each group of meters so added.

 Compute the average on the basis of the 12 month ended figures.

 3. If the customer count in any service classification includes customers counted more than once because of special services, such as water heating, etc., indicate in a footnote the number of such duplicate customers included in the classification.

Name of Respondent

Name of Respondent	This Report Is:	Date of Report	Year/Period of Report
Wisconsin Electric Power Company	(1) X An Original (2) A Resubmission	(Mo, Da, Yr) 03/31/2007	End of2006/Q4
	SALES FOR RESALE (Account 44	(7)	
1. Report all sales for resale (i.e., sales to purcha exchanges during the year. Do not report exchanges			

- energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows: RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five vears.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and the total charge shown on bills rend	ribe the nature or reporting Subtotal - RQ	
the service in a footnote. AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in pyears. Provide an explanation in a footnote for each adjustment. 4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Lis in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k). 5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules which service, as identified in column (b), is provided. 6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) be average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the horintegration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be Footnote any demand not stated on a megawatt basis and explain. 7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser. 8. Report demand charges in column (i). Explain in a footnote all components of the amount shown in column (j). Rep the total charge shown on bills rendered to the purchaser. 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and the total charge shown on bills rendered to the purchaser. 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and the colar column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruct	or reporting Subtotal - RQ	e of
years. Provide an explanation in a footnote for each adjustment. 4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this List in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k) 5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules which service, as identified in column (b), is provided. 6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) by average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the house integration in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be Footnote any demand not stated on a megawatt basis and explain. 7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser. 8. Report demand charges in column (i). Explain in a footnote all components of the amount shown in column (j). Rep the total charge shown on bills rendered to the purchaser. 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and the Last-line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Re line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on F (h) (i) (j) (j) (j) (j) (j) (j) (j) (j) (j) (j	Subtotal - RQ	
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Lis in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k) 5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules which service, as identified in column (b), is provided. 6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) be average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hc integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be Fotontoe any demand not stated on a megawatt basis and explain. 7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser. 8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, incout-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Rep the total charge shown on bills rendered to the purchaser. 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and the total of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Reline 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Footnote entries as required and provide explanations following all required data. Name of Respondent Wisconsin Electric Power Company	This Report Is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report (Mo, Da, Yr) 03/31/2007	Year/Period of Report End of2006/Q4					
PURCHASED POWER(Account 555) (Continued) (Including power exchanges)								
AD - for out-of-period adjustment. Use the years. Provide an explanation in a footnote.	is code for any accounting adjustments te for each adjustment.	or "true-ups" for service	provided in prior reporting					

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.

5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.

6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours

of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.

7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.

8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.

9. Footnote entries as required and provide explanations following all required data.

SALES TO RAILROADS AND RAILWAYS AND INTERDEPARTMENTAL SALES (Accounts 446, 44

- 1. Report particulars concerning sales included in Accounts 446 and 448.
- For Sales to Railroads and Railways, Account 446, give name of railroad or railway in addition to other required information. If contract covers points of delivery and small amounts of electricity are delivered at each point, such sales may be grouped.
 For Interdepartmental Sales, Account 448, give name of other department and basis of charge to other department in addition to other required
- information.
- 4. Designate associated companies.
 5. Provide subheading and total for each account.

LEASE RENTALS CHARGED (Continued)

Description of the property, whether lease is a sale and leaseback, whether lease has option to purchase and conditions of purchase, whether lease is cancellable by either party and the cancellation conditions, the tax treatment used, the accounting treatment of the lease payments (levelized charges to expense or othe treatment), the basis of any charges apportioned between the lessor and lessee, and the responsibility of the respondent for operation and maintenance expense and replacement of property. The above information is to be reported with initiation of the lease and thereafter when changed or every five years, which ever occurs firs 8. Report in column (d), as of the date of the current lease term, the original cost of the property leased, estimated if not known, or the fair market of the property.

greater than original cost and indicate as shown. If leased property is part of a large unit, such as part of a building, indicate without associating any cost or value with it.

9. Report in column (k) below the estimated remaining annual charges under the current term of the lease. Do not apply a present value to the estimate. Assume the cancellable leases will not be cancelled when estimating the remaining charges

The expenses paid by lessee are to be itemized in column (e) below
- 5. Leases of construction equipment in connection with construction work in progress are not required to be reported herein. Continuous, master or open-er leases for EDP or office equipment, automobile fleets and other equipment that is short-lived and replaced under terms of the lease or for pole rental shall report only the data called for in columns a, b(description only), f, g, and j, unless the lessee has the option to purchase the property.
- 6. In column (a) report the name of the lessor. List lessors which are associated companies * first, followed by non-associated lessors
- 7. In column (b) for each leasing arrangement, report in order, classified by generating station, transmission line, distribution system, large substation, or other operating unit or system, followed by any other leasing arrangements not covered under the preceding classifications

LEASE RENTALS CHARGED (Continued)

Description of the property, whether lease is a sale and leaseback, whether lease has option to purchase and conditions of purchase, whether lease is cancellable by either party and the cancellation conditions, the tax treatment used, the accounting treatment of the lease payments (levelized charges to expense or othe treatment), the basis of any charges apportioned between the lessor and lessee, and the responsibility of the respondent for operation and maintenance expense and replacement of property. The above information is to be reported with initiation of the lease and thereafter when changed or every five years, which ever occurs firs 8. Report in column (d), as of the date of the current lease term, the original cost of the property leased, estimated if not known, or the fair market of the property greater than original cost and indicate as shown. If leased property is part of a large unit, such as part of a building, indicate without associating any cost or value with it.

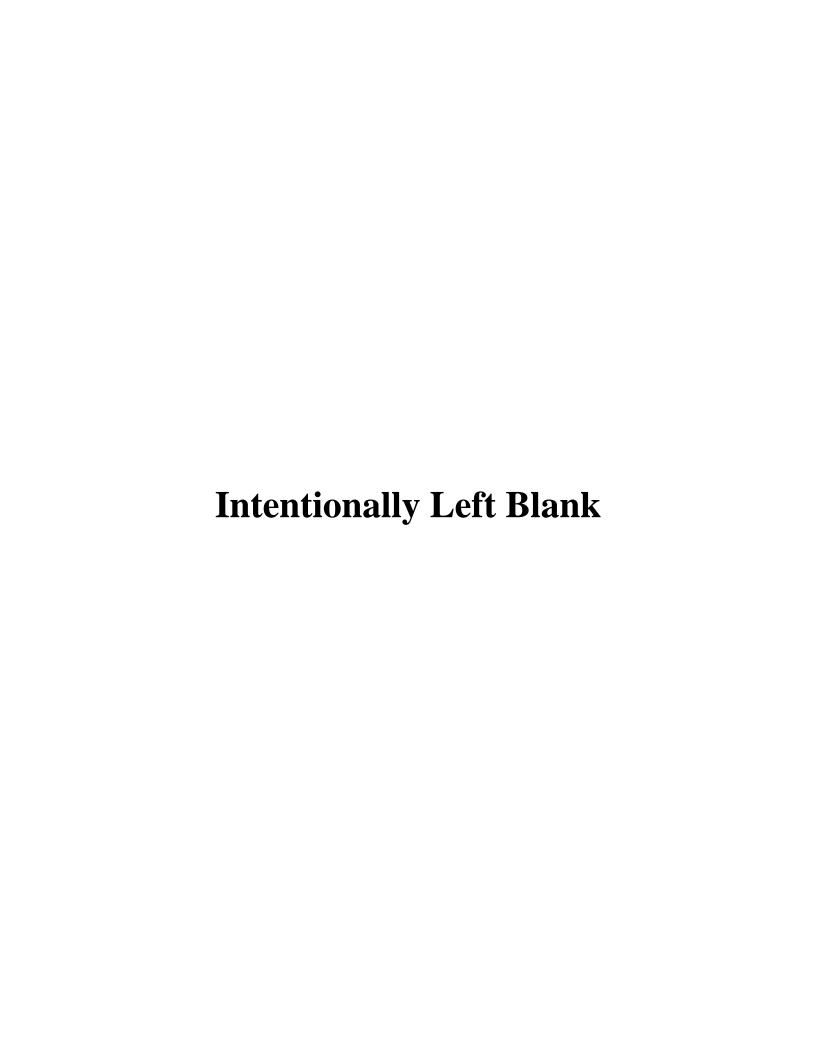

9. Report in column (k) below the estimated remaining annual charges under the current term of the lease. Do not apply a present value to the estimate. Assume the cancellable leases will not be cancelled when estimating the remaining charges

	(1) [X] An Original	(Mo, Da, Yr)		
Wisconsin Electric Power Company	(2) [] A Resubmission	03/31/2007	Dec. 31, 2006	

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Accounts 403, 404, 405)

(Except amortization of acquisition adjustments)

- 1. Report in Section A for the year the amounts for: (a) Depreciation Expense (Account 403); (b) Amortization of Limited-Term Electric Plant (Account 404); and (c) Amortization of Other Electric Plant (Account 405).
- 2. Report in Section B the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute the charges and whether any changes have been made in the basis or rates used from the preceding report year.
- 3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.

Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification,

as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-accounts used.

In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional

classifications and showing a composite total. Indicate at the bottom of Section C the manner in which column (b) balances are obtained. If average balances, state the method of averaging used.

For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant.

If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.

4. If provisions for depreciation were made during the

year in addition to depreciation provided by application of reported rates, state at the bottom of Section C the amounts and nature of the provisions and the plant items to which related.

A. Summary of Depreciation and Amortization Charges

Line	Functional Classification (a)	Depreciation Expense (Account 403) (b)	Amortization of Limited-Term Electric Plant (Account 404) (c)	Amortization of Other Electric Plant (Account 405) (d)	Total (e)

11	Common Plant-Electric	13,436,241	5,797,323	!!!	19,233,564
1 12	TOTAL	\$247,725,821	\$6,802,308		\$254,528,129

B. Basis for Amortization Charges

Amortization accruals are computed by application of certified straight line amortization rates. The amounts of amortized plant base shown are balances as of December 31, 2006. Actual accruals are computed monthly on the preceding month-end amortizable plant balances.

PARTICULARS CONCERNING CERTAIN INCOME DEDUCTIONS AND INTEREST CHARGES ACCOUNTS

Report the information specified below, in the order given, for the respective income deduction and interest charges accounts. Provide a subheading for each account and a total for the account. Additional columns may be added if deemed appropriate with respect to any account.

deemed appropriate with respect to any account.

(a) Miscellaneous Amortization (Account 425) - Describe the nature of items included in this account, the contra account charged, the total of amortization charges for the year, and the period of amortization.

the period of amortization.

(b) Miscellaneous Income Deductions - Report the nature, payee, and amount of other income deductions for the year as required by Accounts 426.1, Donations; 426.2, Life Insurance; 426.3, Penalties; 426.4, Expenditures for Certain Civic, Political and Related Activities; and 426.5, Other Deductions, of the Uniform System of Accounts. Amounts of less than 5% of

each account total for the year (or \$1,000, whichever is greater) may be grouped by classes within the above accounts.

(c) Interest on Debt to Associated Companies (Account 430) - For each associated company to which interest on debt was incurred during the year, indicate the amount and interest rate respectively for(a)advances on notes, (b) advances on open account,(c) notes payable, (d) accounts payable, and (e) other debt, and total interest. Explain the nature of other debt on which interest was incurred during the year.

(d) Other Interest Expense(Account 431) - report particulars (details) including the amount and interest rate for other interest charges incurred during the year.

COMMON U	JTILITY PLANT AND EXPENSES		

Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant
at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts.
Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of

allocation used, giving the allocation factors.

2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications

of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.

- 3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
- 4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

Basis for common plant allocation: Common plant in service, construction work in progress depreciation expense and accumulated depreciation reserve are allocated to utilities based upon the average of three ratios: non-fuel operating and maintenance expenses, operating revenues and net investment rate basis.

Common plant operation and maintenance charges and rents are not separately accounted for and, therefore, are not available.

Other Debit or Credit items: Primarily a transfer of Communication Equipment to Gas and Electric business segments.

CHARGES FOR OUTSIDE PROFESSIONAL AND OTHER CONSULTATIVE SERVICE:

- 1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside consultative and other professional services. (These services include rate, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered the respondent under written or oral arrangement, for which aggregate payments were made during the year to any corporation, partnership, organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounting to more than \$25,000, including payments for legislative services, except those which should be reported in Account 426.4, Expenditures for Certain Civic, Political and Related Activities.)
 - (a) Name and address of person or organization rendering services,
 - (b) description of services received during year and project or case to which services relate,
 - (c) basis of charges,
- (d) total charges for the year, detailing utility department and account charged.
- 2. For any services which are of a continuing nature, give the date and term of contract and date of Commission authorization, if contract received Commission approval.
- 3. Designate with an asterisk associated companies.

SUMMARY OF COSTS BILLED TO AFFILIATES

- 1. In column (a) report the name of the associated company.
- In column (a) report the name of the associated company.
 In column (b) describe the affiliation (percentage ownership, etc.)
 In column (c) describe the nature of the goods and services provided (administrative and general expenses, dividends declared, etc.)
 In columns (d) and (e) report the amount classified to operating income and the account(s) in which reported.

CHANGES MADE OR SCHEDULED TO BE MADE IN GENERATING PLANT CAPACITIES

Give below the information called for concerning charges in electric generating plant capacities during the year.

A. Generating Plants or Units Dismantled, Removed from Service, Sold, or Leased to Other During Year

- 1. State in column (b) whether dismantled, removed from service, sold, or leased to another. Plants removed from service include those not maintained for regular or emergency service.

 2. In column (f), give date dismantled, removed from service, sold, or leased to another. Designate complete plants as such

			Installed	d Capacity (in me	gawatts)		If Sold or Leased,

STEAM-ELECTRIC GENERATING PLANTS

- 1. Include on this page steam-electric plants of 25,000 Kw (name plate rating) or more of installed capacity.
- Report the information called for concerning generating plants and equipment at year-end. Show unit type installation, boiler, and turbine-generator on same line.

 Exclude plant, the book cost of which is included in Account 121, Nonutility Property.

 Designate any generating plant or portion thereof for which the respondent is not the sole owner. If such property is leased from another company give name of lessor,
- . Designate any generating plant or portion thereof for which the respondent is not the sole owner. If such property is leased from another company give name of lessor, date and term of lease, and annual rent. For any generating plant, other than a leased plant or portion thereof for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving details as to such matters as percent ownership by respondent, name of co-owner, basis of sharing output, expenses or revenues, and how expenses and/or revenues are accounted for and accounts affected. Specify if lessor, co-owner, or other party is an associated company.
 . Designate any generating plant or portion thereof leased to another company and give name of lessee, date and term of lease and annual rent, and how determined.
- Specify whether lessee is an associated company.

 6. Designate any plant or equipment owned, not operated, and not leased to another company. If such plant or equipment was not operated within the past year, explain whether it has been retired in the books of account or what disposition of the plant or equipment and its book cost are contemplated.

 7. Report gas-turbines operated in a combined cycle with a conventional steam unit with its associated steam unit.

Name of Respondent	This Report Is:	Date of Report	Year of Report
Wisconsin Electric Power Company	(1) [X] An Original	(Mo, Da, Yr)	
	(2) [] A Resubmission	03/31/07	Dec. 31, 2006

STEAM-ELECTRIC GENERATING PLANTS (Continued)

- 1. Include on this page steam-electric plants of 25,000 Kw (name plate rating) or more of installed capacity.
- 2. Report the information called for concerning generating plants and equipment at year-end. Show unit type installation, boiler, and turbine-generator on same line.

 3. Exclude plant, the book cost of which is included in Account 121, Nonutility Property.

 4. Designate any generating plant or portion thereof for which the respondent is not the sole owner. If such property is leased from another company give name of lessor,

- to be signate any generating plant or portion intereor for which the respondent is not the sole owner. In such property is leased in rom another company give name or lessor, date and term of lease, and annual rent. For any generating plant, other than a leased plant or portion thereof for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving details as to such matters as percent ownership by respondent, name of co-owner, basis of sharing output, expenses or revenues, and how expenses and/or revenues are accounted for and accounts affected. Specify if lessor, co-owner, or other party is an associated company.

 5. Designate any generating plant or portion thereof leased to another company and give name of lessee, date and term of lease and annual rent, and how determined.
- Specify whether lessee is an associated company.

 6. Designate any plant or equipment owned, not operated, and not leased to another company. If such plant or equipment was not operated within the past year, explain whether it has been retired in the books of account or what disposition of the plant or equipment and its book cost are contemplated.

 7. Report gas-turbines operated in a combined cycle with a conventional steam unit with its associated steam unit.

Turbine-Generators (Report cross-compound turbine-generator units on two lines--H.P. section and I.P. section. Designate units with shaft connected boiler feed pmumps.

Give capacity rating of pumps in terms of full load requirements.

Wisconsin Electric Power Company	(1) [X] An Original	(Mo, Da, Yr)	
	(2) [] A Resubmission	03/31/07	Dec. 31, 2006

- 1. Report on this page Hyrdo plants of 10,000 Kw (name plate rating) or more of installed capacity.
- 2. Report the information called for concerning generating plants and equipment at year end. Show associated prime movers and generators on the same line.

 3. Exclude from this schedule, plant, the book cost of which is included in Account 121, Nonutility Property.
- 4. Designate any plant or portion thereof for which the responsibility is not the sole owner. If such property is leased from another company, give name of lessor, date and term of lease, and annual rent. For any generating plant, other than a leased plant, or portion thereof, for which the respondent is not the sole owner but which respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) as to such matters as percent ownership by respondent, name of co-owner, basis of sharing output, expenses, or revenues, and how expenses and/or revenues are accounted for and accounts affected. Specify if lessor, co-owner,
- or other party is an associated company.
 5. Designate any plant or portion thereof leased to another company, and give name of lessee, date and term of lease and annual rent, and how determined. Specify whether lessee is an associated company.
- 6. Designate any plant or equipment owned, not operated, and not leased to another company. If such plant or equipment was not operated within the past year, explain whether it has been retired in the books of account or what disposition of the plant or equipment and its book cost are contemplated.

				Water Wheels (In column (e), indicate whether horizontal or vertical. Also indicate type of runnerFrancis (F), fixed propeller (FP, automatically adjustable propeller (AP), Impulse (I). Designate reversible type units by appropriate footnote.)

FERC FORM NO. 1 (ED. 12-96)

SUBSTATIONS (Continued) 5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for	Name of Respondent		This (1)	Report	ls: Original	Date of Re (Mo, Da, Y	eport (r)		ar/Period of Repor	
5. Show in columns (I), (I), and (Ik) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity. 6. Designate substations or major items of equipment leaded from others, initity owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of lessons, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of lessons, date and occounts of other party, explain basis of sharing repenses or other accounting between the parties, and state amount accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company. Capacity of Substation (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in Service (In M/a) in S	Wisconsin Electric Power C	Company		☐ A I	Resubmission			End	d of2006/Q4	! =
reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership of report of party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company. Capacity of Substation (In Service) (In MVa) In Transformers In Service (I) In Mumber of Spare Transformers In Service (II) In Mumber of Spare Transformers In Service (II) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Spare Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units Transformers In Service (III) In Mumber of Units T	increasing capacity.			uch a	s rotary converters, rec					
of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Wisconsin Electric Power Company	TOTAL PROPERTIES AND LIN	E TRANSFORMERS	

ELECTRIC DISTRIBUTION METERS AND LINE TRANSFORMERS

- 1. Report below the information called for concerning distribution watt-hour meters and line transformers.
- 2. Include watt-hour demand distribution meters, but not external demand meters.
- 3. Show in a footnote the number of distribution watthour meters or line transformers held by the respondent under lease from others, jointly owned with others, or held otherwise than by reason of sole ownership by the respondent. If 500 or more meters or line transformers

are held under a lease, give name of lessor, date and period of lease, and annual rent. If 500 or more meters or line transformers are held other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of accounting for expenses between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner or other party is an associated company.

ENVIRONMENTAL PROTECTION FACILITIES

- 1. For purposes of this response, environmental protection facilities shall be defined as any building, structure, equipment, facility, or improvement designed and constructed solely for control, reduction, prevention or abatement of discharges or releases into the environment of gaseous, liquid, or solid substances, heat, noise or for the control reduction, prevention, or abatement of any other adverse impact of an activity on the environment.
- 2. Report the differences in cost of facilities installed for environmental considerations over the cost of alternative facilities which would otherwise be used without environmental considerations. Use the best engineering design achievable without environmental restrictions as the basis for determining costs without environmental considerations. It is not intended that special design studies be made for purposes of this response. Base the response on the best engineering judgement where direct comparisons are not available.

Include in these differences in costs the costs or estimated costs of environmental protection facilities in service, constructed or modified in connection with the production, transmission, and distribution of electrical energy and shall be reported herein for all such environmental facilities placed in service on or after January 1, 1969, so long as it is readily determinable that such facilities were constructed or modified for environmental rather than operational purposes. Also report similar expenditures for environmental plant included in construction work in progress. Estimate the cost of facilities when the original cost is not available or facilities are jointly owned with another utility, provided the respondent explains the basis of such estimations.

Examples of these costs would include a portion of the costs of tall smokestacks, underground lines, and landscaped substations. Explain such costs in a footnote.

- 3. In the cost of facilities reported on this page include an estimated portion of the cost of plant that is of will be used to provide power to operate associated environmental protection facilities. These costs may be estimated on a percentage of plant basis. Explain such estimations if a footnote.
- 4. Report all costs under the major classifications provided below and include, as a minimum, the items lister hereunder:
 - A. Air pollution control facilities:
 - (1) Scrubbers, percipitators, tall smokestacks, etc
 - (2) Changes necessary to accommodate use of environmentally clean fuels such as low ash or low sulfur fuels including storage and handling equipment

- (3) Monitoring equipment
- (4) Other.
- B. Water pollution control facilities:
 - (1) Cooling towers, ponds, piping, pumps, etc
 - (2) Waste water treatment equipment
 - (3) Sanitary waste disposal equipment
 - (4) Oil interceptors
 - (5) Sediment control facilities
 - (6) Monitoring equipment
 - (7) Other.
- C. Solid waste disposal costs:
- (1) Ash handling and disposal equipment
- (2) Land
- (3) Settling ponds
- (4) Other.
- D. Noise abatement equipment:
 - (1) Structures
 - (2) Mufflers
 - (3) Sound proofing equipment
 - (4) Monitoring equipment
 - (5) Other.
- E. Esthetic costs:
 - (1) Architectural costs
 - (2) Towers
 - (3) Underground lines
 - (4) Landscaping
 - (5) Other.
- F. Additional plant capacity necessary due to restricted output from existing facilities, or addition of pollution control facilities.
- G. Miscellaneous:
 - (1) Preparation of environmental reports
 - (2) Fish and wildlife plants included in Accounts 330, 331, 332, and 335.
 - (3) Parks and related facilities
 - (4) Other.
- 5. In those instances when costs are composites of both actual supportable costs and estimates of costs specify in column (f) the actual costs that are included in column (e).
- 6. Report construction work in progress relating to environmental facilities at line 9.

In 2006 WE sold energy to Wisconsin and Non-Wisconsin based companies. During 2006 Wisconsin based sales consisted of 1,774,979 mwhs and \$65,842,755 and Non-Wisconsin based sales consisted of 2,047,523 mwhs and \$103,093,045.

Other Charges - Fuel Cost Adjustment, Customer Charges, Option Charges, Distribution Charges, Transmission Charges, Voltage Sufficiency Credit and Standby Service Fee Charges.

OS=OTHER SERVICE: Consisted of sales of General Purpose, Emergency, Negotiated Capacity, Spin, and Market Based energy.

FERC MWH Netting Difference: Beginning in early June 2006, the FERC issued a clarification to its Order 668 that requires the separate netting of the Day Ahead and Real Time Energy Market transactions for RTO markets. Prior to that period, all Day Ahead and Real Time Energy Market transactions were netted together on an hourly basis to determine the net purchase or sale position for each hour. For 2006 reporting, the PSCW has allowed the combined netting of the Day Ahead and Real Time Energy Market transactions for RTO markets in order to be consistent with the 2005 netting methodology. Due to these differences in reporting requirements, the purchase and sale amounts reported to the FERC are higher than the amounts reported to the PSCW as follows:

FERC Form 1 Purchases MWH Netting Adjustment PSCW Purchases	MWH 4,484,575 (567,263) 3,917,312	FERC Form 1 Sales MWH Netting Adjustment PSCW Sales	MWH 3,822,502 (567,263) 3,255,239

Account 507, Steam Power Generation Rents, and account 550, Other Power Generation Rents, reflect Power The Future (PTF) expense of \$93,500,386 and \$77,508,226 respectively in 2006, for a combined total generation rent expense of \$171,008,612 for the year. The actual rent expense in these accounts consist of a component equal to Wisconsin regulatory rate recovery provided under PSCW authorized regulatory escrow accounting treatment, and a second component equal to the non-Wisconsin portion of actual PTF lease charges from We Power plus an amortization of prepaid lease amounts. Actual total company We Power operating lease billings and amortization of prepaid lease amounts totaled \$51,425,839 for 2006. The difference between the \$171,008,612 booked expense and \$51,425,839 actual billings plus amortization equals a \$119,582,773 adjustment that would restate (reduce) the total expense in accounts 507 and 550 to remove PSCW deferral accounting.

FERC MWH Netting Difference

Beginning in early June 2006, the FERC issued a clarification to its Order 668 that requires the separate netting of the Day Ahead and Real Time Energy Market transactions for RTO markets. Prior to that period, all Day Ahead and Real Time Energy Market transactions were netted together on an hourly basis to determine the net purchase or sale position for each hour. For 2006 reporting, the PSCW has allowed the combined netting of the Day Ahead and Real Time Energy Market transactions for RTO markets in order to be consistent with the 2005 netting methodology. Due to these differences in reporting requirements, the purchase and sale amounts reported to the FERC are higher than the amounts reported to the PSCW as follows:

FERC Form 1 Purchases 4,484,575

MWH Netting Adjustment (567,263)

PSCW Purchases 3,917,312

The final retirement of the Port Washington Power Plant took place in September, 2004. Remaining dollars in the "Cost of Plant" lines are related to the Cedar/Sauk landfill which contains ash from the coal burned in all the plant's generating units over the years. The cost of this landfill property will remain on the books indefinitely.

Schedule Page: 402 Line No.: -1 Column: f

Instruction 12:

- Operating and Maintenance costs of Point Beach Nuclear Plant are charged to a.) expense as incurred.
- Wisconsin Electric Power Company currently leases the fuel for Point Beach. b.) The fuel value and lease costs are charged to expense over the period the fuel is in the reactor, based on the quantity of heat produced for the generation of electric energy.
- c.) The Point Beach Nuclear Plant consists of two 2-loop pressurized water reactors of Westinghouse design. Both reactors are rated at 1540 megawatts thermal power.

Fuel material is in the form of Uranium Dioxide (UO2) pellets that are sealed in metal tubes called 'fuel rods'. The fuel rod material (cladding) is made of zirconium alloys. The UO2 pellets contain principally Uranium-238 that is enriched with Uranium-235. The UO2 pellet initial enrichments range from approximately 0.711 w% to 4.95 w% Uranium-235. A typical equilibrium cycle core contains approximately 48 metric tons of Uranium.

STATEMENT OF CASH FLOWS

- 1. Codes to be used: (a) Net Proceeds or Payments; (b) Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
- 2. Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
- 3. Operating Activities Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
- 4. Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

Description (a)	Amount (b)
Net Cash Flow from Operating Activities:	
Net Income	276,753,265
Noncash Charges (Credits) to Income:	
Depreciation and Depletion	258,300,000
Amortization of: Nuclear Fuel	28,736,293
Debt Premium, Discount & Expense	1,337,944
Deferred Income Taxes (Net)	(55,363,564)
nvestment Tax Credit Adjustment (Net)	(3,906,032)
Net (Increase) Decrease in Receivables	11,571,784

STATEMENT OF CASH FLOWS

- 1. Codes to be used: (a) Net Proceeds or Payments; (b) Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
- 2. Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
- 3. Operating Activities Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
- 4. Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

Accumulated Provision for Depreciation - Electric (Page E-14)

General footnotes

Adjustment column includes transfers, reclasses, adjustments, and the addition of beginning balances for accounts 302,303,310,320,340,360,389 as they were not on last years filed report.

- 1. Report data for plant in service only.
- 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, sand nuclear plants.
- 3. Indicate by a footnote any plant leased or operated as a joint facility.
- 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period.
- 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant.

 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct.

 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to
- expense accounts 501 and 547 (Line 42) as shown on Line 20.
- 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

PSCW Annual Report: PAE Date Printed: 04/30/2007 1:06:57 PM

- Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and other expenses classified as Other Power Supply Expenses.
- 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants.
- 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant.
- 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

- 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, sand nuclear plants.
- 3. Indicate by a footnote any plant leased or operated as a joint facility.
- 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period.
- 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant.

 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct.
- 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as shown on Line 20.
- 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

Footnotes								

- 9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and other expenses classified as Other Power Supply Expenses.
- 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants.
- 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant.
- 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

- 1. Report data for plant in service only.
- 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, sand nuclear plants.
- 3. Indicate by a footnote any plant leased or operated as a joint facility.
- 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period.
- 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant.

 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct.
- 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as shown on Line 20.
- 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

Footnotes						

- 9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and other expenses classified as Other Power Supply Expenses.
- 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants.
- 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant.
- 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

Avg Heat Cont - Fuel Burned (btu/indicate if nuclear)		1,010	8,811		1,010	8,815	→
Avg Cost of Fuel/Unit, as Delvd f.o.b. during year		8.102	24.125		8.132	24.046	-
Average Cost of Fuel per Unit Burned		8.102	24.125		8.132	24.046	→
Average Cost of Fuel Burned per Million BTU		802.199	136.901		805.142	136.394	-
Average Cost of Fuel Burned per KWh Net Gen		8.022	1.368		7.925	1.342	4
Average BTU per KWh Net Generation		9,994.000			9,840.000		$\frac{1}{1}$
Footnotes	1						1

- 9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and other expenses classified as Other Power Supply Expenses.
- 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants.
- 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant.
- 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.
